Overview

- The Trust performed well in October, outperforming by +1.5% as the market rewarded our significant overweight in gold shares and cash in a falling market.
- Rising interest rates and increasing trade tensions saw global markets sold off in October, with the S&P500 -6.9%, FTSE 100 -5.1%, Nikkei 225 -9.1% and Shanghai Composite -7.7%.
- The sell-off was broad-based, with all sectors of the market delivering negative returns. However, many of the more expensive parts of the market such as Healthcare and IT, which we avoid on the basis of overvaluation, were hit particularly hard.

Perennial Value Active Plus Shares Trust

The aim of the Trust is to grow the value of your investment over the long term by investing in a concentrated portfolio of Australian companies and to provide a total return that exceeds the S&P/ASX300 Accumulation Index measured on a rolling three-year basis.

Trust Review

The broad-based, global macro nature of the sell-off in October saw both Industrials (-6.1%) and Resources (-6.5%) decline by a similar amount. However, the risk-off environment, saw strong performances from our holdings in gold stocks with Newcrest (+6.2%) rallying as investors sought the safety of gold.

Other holdings which delivered positive returns over the month included Vocus Communications (+4.6%) as the market continues to gain confidence in the turnaround strategy, Graincorp (+4.3%) as investors began to focus on the seasonal conditions returning to normal and QBE (+1.8%), with its leverage to rising interest rates.

Other holdings which outperformed included NewsCorp (-0.3%), Ausdrill (-1.1%), Amcor (-2.8%), and Rio Tinto (-3.0%).

The Trust also benefited from being underweight on valuation grounds in a number of expensive growth stocks including REA Group (-16.7%), Seek (-14.0%), Treasury Wines (-13.6%) and Cochlear (-11.5%). The Trust also benefited from not holding AMP (-22.6%) which fell sharply after announcing the sale of its life business for a price which disappointed the market.

The major banks performed in line with the market, delivering an average return of -6.1%. Sentiment towards the sector is still negative due to the combination of the Royal Commission and concerns around the outlook for the housing market. However, while the growth outlook for the banks is definitely very muted, they are trading on attractive valuations and offering compelling dividend yields, justifying a position in the Trust.

The main detractors from performance were Energy stocks Origin (-11.7%) and Woodside (-9.7%) which fell on a weaker oil price. However, we view this as temporary and have a positive medium-term view on oil and LNG prices and the outlook for both of these companies.

Trust Activity

During the month, we took profits and trimmed our holding in a number of stocks which had performed strongly over recent times including Vocus Communications and Graincorp. Proceeds were used to increase our holdings in a number of good value opportunities including Star Group, Worley and Lend Lease.

At month end, stock numbers were 30 and cash was 6.4%.

Outlook

Following the recent sell-off, the market is now trading in line with its long-term average, with a one year forward P/E of 14.6 and offering an attractive gross dividend yield of over 6.0%.

Within the overall market, we are currently finding many good value investment opportunities. Across both the industrial and resources sectors, we are seeing many quality companies trading on attractive valuations which should deliver solid returns to investors from these levels.

The Trust continues to exhibit Perennial Value's true to label value characteristics, with the Trust offering better value than the overall market on each of our four valuation characteristics: price to earnings, price to free cash flow, gross dividend yield and price to net tangible assets.

As always, our focus will continue to be on investing in quality companies which are offering attractive valuations and have the ability to deliver high levels of franked dividend income to investors.
