Overview

- The Australian stock market continued its rise, delivering a return of 1.4% for the month of August, bringing the total return for the last 12 months to a healthy 15.4%.
- The highlight of the month was the company reporting season, with the overall market delivering earnings per share growth of approximately 8.0% for FY18.
- Offshore markets were mixed, with the S&P500 up 3.0% and the Nikkei 225 up 1.4%, while the FTSE100 was down 4.1% and Shanghai Composite was down 5.3%.

Perennial Value Shares for Income Trust

The objective of the Trust is to provide investors with an attractive level of tax effective income, paid via monthly distributions. The Trust aims to provide a gross distribution yield, adjusted for applicable franking credits, above that provided by the S&P/ASX300 Franking Credit Adjusted Daily Total Return Index (Tax-Exempt).

Trust Review

The highlight of the month was the company reporting season, which could best be described as solid. The majority of companies delivered increased earnings and dividends, reflecting the overall health of the underlying economy both domestically and offshore.

Holdings which performed well over the month included Magellan Financial Group (+17.2%), which rallied after delivering a solid result and a significant increase in the dividend. Telstra (+13.0%) rose on the news of a merger between competitors TPG and Hutchison Australia, the operator of the Vodafone network. While the merger will create a stronger third player, it is expected to be significantly better for the competitive dynamic than if TPG had become a fourth entrant in the mobile market. Star Entertainment (+11.3%) outperformed after reporting a strong increase in International VIP business and Event Hospitality (+10.3%) rose on the back of strong growth in its hotel division.

The major banks underperformed slightly, as CBA (-1.7%) delivered a subdued result and sentiment continues to be impacted by the Royal Commission, while resources stocks were generally softer on trade and tariff concerns, with BHP (-4.7%) and Rio Tinto (-8.3%).

Other detractors from performance included Flight Centre (-14.1%), on the back of a slightly soft result, Janus Henderson (-10.0%) after announcing the departure of its well-regarded CEO and Caltex Australia (-7.2%).

Trust Activity

During the month, we reduced our holdings in the major banks following their recent rally. Proceeds were used to increase our holdings in a number of stocks including Suncorp and Telstra and to introduce HT&E into the Trust. At month end, stock numbers were 31 and cash was 3.9%.

Net performance is based on redemption price for the period and assumes that all distributions are reinvested. Fees indicated reflect the maximum applicable. Contractual arrangements, including any applicable management fee, may be negotiated with certain large investors. Investments in the Trusts must be accompanied by an application form. The current relevant product disclosure statements, additional information booklet and application forms can be found on Perennial's website www.perennial.net.au.

Distribution

In order to provide a more regular income stream, commencing in January 2018, the Trust has moved from paying quarterly to monthly distributions. We will aim to pay equal cash distributions each month, based on our estimate of the income to be generated over the year. Franking credits and any realised capital gains will then be distributed, as per usual, with the June distribution. This aims to give investors more certainty over their income payments.

Outlook

Despite the ongoing negative political atmosphere, the economic backdrop continues to be positive, both domestically and offshore, with healthy growth and low unemployment in most major regions. This is supportive of ongoing moderate corporate earnings growth, healthy resources demand and financial system stability. The Trust is exposed to this dynamic through its positions in the large-cap, low-cost resource stocks, the major banks and a range of quality industrials. We continue to avoid those sectors of the market where valuations are high and those which are exposed to the risk of rising interest rates such as Healthcare, REITs and Infrastructure.

The Trust continues to offer a higher forecast gross yield than the overall market and, as always, our focus will continue to be on investing in quality companies which are offering attractive valuations and have the ability to deliver high levels of franked dividend income to investors. Further, we believe the current very low interest rates highlight the relative attractiveness of financially-sound, high dividend yielding equities.
