These financial statements cover Perennial Value Active Plus Shares Trust as an individual entity.

The Responsible Entity of Perennial Value Active Plus Shares Trust is Perennial Investment Management Limited (ABN 13 108 747 637). The Responsible Entity's registered office is Level 27, 88 Phillip Street, Sydney, NSW 2000.

Directors' report

The Directors of Perennial Investment Management Limited, the Responsible Entity of Perennial Value Active Plus Shares Trust, present their report together with the financial statements of Perennial Value Active Plus Shares Trust ("the Scheme") for the reporting period ended 30 June 2020 ("the reporting period").

The Scheme is a registered managed investment scheme domiciled in Australia.

Responsible Entity

The Responsible Entity of Perennial Value Active Plus Shares Trust is Perennial Investment Management Limited (ABN 13 108 747 637). The Responsible Entity's registered office is Level 27, 88 Phillip Street, Sydney, NSW 2000.

Principal activities

During the period, the Scheme invested funds in accordance with the following investment objective:

- To grow the investment over the long term by investing in a concentrated portfolio of Australian companies and to provide a total return that exceeds the S&P/ASX300 Accumulation Index measured on a rolling three-year basis.

The investment objective is disclosed in the current Product Disclosure Statement and in accordance with the provisions of the Scheme's Constitution.

The Scheme did not have any employees during the reporting period.

There were no significant changes in the nature of the Scheme's activities during the reporting period.

Directors

The following persons held office as Directors of Perennial Investment Management Limited during the reporting period or since the end of the reporting period and up to the date of this report, unless otherwise stated:

A. Patterson
C. Love
M. Bennett

Indirect Cost Ratio (ICR)

The indirect cost ratio of the Scheme is shown in the following table:

	2020 **%**	2019 %
Indirect Cost Ratio	**0.92**	0.92

The cost is calculated on the net asset value of the Scheme and is deducted from the assets of the Scheme. The cost is accrued daily and paid monthly and is incorporated into the daily unit prices of the Scheme. The indirect cost ratio calculation includes investment management fees charged to the Scheme during the reporting period, including those charged by the Responsible Entity directly for the management of the assets.

Review and results of operations

There have been no significant changes to the operations of the Scheme during the reporting period. The Scheme invested funds in accordance with target asset allocations as set out in the governing documents of the Scheme and in accordance with the provisions of the Scheme's Constitution.

Directors' report (continued)

Review and results of operations (continued)

The performance of the scheme, as represented by the results of its operations, was as follows:

	For the reporting period ended	
	30 June 2020	30 June 2019
Total comprehensive income for the period ($'000)	**(2,273)**	1,388
Distributions paid and payable ($'000)	**862**	736
Distributions (cents per unit - CPU)	**5.191**	4.638

Distributions to unitholders are disclosed in note 7.

Significant changes in state of affairs

Since 31 December 2019, the COVID-19 pandemic has caused significant volatility and uncertainty in global and domestic markets. Management continue to monitor the ongoing current situation on a regular basis. At the date of this report, there is no indication of significant changes to the carrying value of assets and liabilities of the Scheme. Apart from this, there has not arisen in the interval between 30 June 2020 and the date of this report any other item, transaction or event of a material and unusual nature likely, in the opinion of the directors of the Scheme, to affect significantly the operations of the Scheme, the results of those operations or the state of affairs of the Scheme, in future financial years.

In the opinion of the directors, there were no other significant changes in the state of affairs of the Scheme that occurred during the reporting period.

Likely developments and expected results of operations

The Scheme will continue to be managed in accordance with the investment objectives and guidelines as set out in the governing documents of the Scheme and in accordance with the provisions of the Scheme's Constitution.

The results of the Scheme's operations will be affected by a number of factors, including the performance of investment markets in which the Scheme invests. Investment performance is not guaranteed and future returns may differ from past returns. As investment conditions change over time, past returns should not be used to predict future returns.

Further information on likely developments in the operations of the Scheme and the expected results of those operations have not been included in this report because the Responsible Entity believes it would be likely to result in unreasonable prejudice to the Scheme.

Indemnification and insurance of officers and auditors

There is a Directors' and Officers' insurance policy which indemnifies the Directors and Officers of Perennial Investment Management Limited against liabilities to persons outside Perennial Investment Management Limited that arise out of the performance of their normal duties. The premiums have not been paid for out of the assets of the Scheme. The auditor of the Scheme is in no way indemnified out of the assets of the Scheme.

Fees paid to and interests held in the Scheme by the Responsible Entity or its related parties

Fees paid to the Responsible Entity and its related parties out of the Scheme property during the reporting period are disclosed in note 12 of the financial statements.

No fees were paid out of Scheme property to the Directors of the Responsible Entity during the reporting period.

The number of interests in the Scheme held by the Responsible Entity or its associates as at the end of the reporting period are disclosed in note 12 of the financial statements.

Directors' report (continued)

Interests in the Scheme

The movements in units on issue in the Scheme during the reporting period are disclosed in note 6 of the financial statements.

The value of the Scheme's assets and liabilities is disclosed in the statement of financial position and derived using the basis set out in note 2 of the financial statements.

Environmental regulation

The operations of the Scheme are not subject to any particular or significant environmental regulations under a Commonwealth, State or Territory Law.

Events occurring after the reporting period

Except as disclosed in note 14 in the financial statements, no other matter or circumstance has arisen since 30 June 2020 that has significantly affected, or may significantly affect:

(i) the operations of the Scheme in future reporting periods; or
(ii) the results of those operations in future reporting periods; or
(iii) the state of affairs of the Scheme in future reporting periods.

Rounding of amounts to the nearest thousand dollars

The Scheme is an entity of the kind referred to in ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191 issued by the Australian Securities and Investments Commission ("ASIC") relating to the "rounding off" of amounts in the Directors' report. Amounts in the Directors' report have been rounded to the nearest thousand dollars in accordance with that ASIC Instrument, unless otherwise indicated.

Auditor's independence declaration

The lead auditor's independence declaration, as required under section 307C of the *Corporations Act 2001*, is set out on page 5 and forms part of the Directors' Report for the period ended 30 June 2020.

Signed in accordance with a resolution of the Directors of Perennial Investment Management Limited.

A. Patterson

KPMG

Lead Auditor's Independence Declaration under Section 307C of the Corporations Act 2001

To the Directors of Perennial Investment Management Limited

I declare that, to the best of my knowledge and belief, in relation to the audit of Perennial Value Active Plus Shares Trust for the financial year ended 30 June 2020 there have been:

i. no contraventions of the auditor independence requirements as set out in the *Corporations Act 2001* in relation to the audit; and

ii. no contraventions of any applicable code of professional conduct in relation to the audit.

1 General information

These financial statements cover Perennial Value Active Plus Shares Trust ("the Scheme") as an individual entity. The Scheme was constituted on 9 March 2017. The Scheme will terminate on 9 March 2097 unless terminated earlier in accordance with the provisions of the Scheme's Constitution. The Scheme invests in equities, property trusts and derivatives in accordance with the provisions of the Scheme's Constitution.

The Responsible Entity of the Scheme is Perennial Investment Management Limited ("the Responsible Entity"). The Responsible Entity's registered office is Level 27, 88 Phillip Street, Sydney, NSW 2000. The Responsible Entity's ABN is 13 108 747 637.

The Responsible Entity is incorporated and domiciled in Australia.

The financial statements are presented in the Australian currency.

The financial statements are for the period 1 July 2019 to 30 June 2020 ("the reporting period").

The financial statements were authorised for issue by the Directors on 22 September 2020. The Directors of the Responsible Entity have the power to amend and reissue the financial statements.

2 Summary of significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below.

(a) Basis of preparation

These general purpose financial statements have been prepared in accordance with Australian Accounting Standards, other authoritative pronouncements of the Australian Accounting Standards Board and the *Corporations Act 2001* in Australia.

The financial statements are prepared on the basis of fair value measurement of assets and liabilities except where otherwise stated.

The statement of financial position is presented on a liquidity basis. Assets and liabilities are presented in decreasing order of liquidity and are not distinguished between current and non-current. All balances are generally expected to be recovered or settled within twelve months, except for investments in financial assets and net assets attributable to unitholders. The amount expected to be recovered or settled within twelve months after the end of the reporting period cannot be reliably determined.

Compliance with Australian Accounting Standards and International Financial Reporting Standards

The financial statements of the Scheme comply with Australian Accounting Standards as issued by the Australian Accounting Standards Board and also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board.

New/Amended standards and interpretations adopted by the Scheme

There are no standards, interpretations or amendments to existing standards that are effective for the first time for the financial year beginning 1 July 2019 that have a material impact on the amounts recognised in the prior periods or will affect the current or future periods.

(b) Financial instruments

(i) Classification

Classification and measurement of debt securities is driven by the Scheme's business model for managing the financial assets and the contractual cash flow characteristics of the financial assets.

A debt instrument is measured at amortised cost if the objective of the business model is to hold the financial asset for the collection of the contractual cash flows and the contractual cash flows under the instrument represent solely payments of principal and interest (SPPI).

A debt instrument is measured at fair value through other comprehensive income if the objective of the business model is to hold the financial asset both to collect contractual cash flows from SPPI and to sell.

All other debt instruments must be recognised at fair value through profit or loss. A Scheme may however, at initial recognition, irrevocably designate a financial asset as measured at fair value through profit or loss if doing so eliminates or significantly reduces a measurement or recognition inconsistency.

2 Summary of significant accounting policies (continued)

(b) Financial instruments (continued)

Derivative and equity instruments are measured at fair value through profit or loss unless, for equity instruments not held for trading, an irrevocable option is taken to measure at fair value through other comprehensive income.

Assets

The Scheme classifies its investments based on its business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The Scheme's portfolio of financial assets is managed and performance is evaluated on a fair value basis in accordance with the Scheme's documented investment strategy. The Responsible Entity evaluates the information about these financial assets on a fair value basis together with other related financial information.

For equity securities and derivatives such as futures and foreign currency contracts, the contractual cash flows of these instruments do not represent solely payments of principal and interest. Consequently, these investments are measured at fair value through profit or loss.

For debt securities, the contractual cash flows are solely payments of principal and interest, however they are neither held for collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving the Scheme's business model's objective. Consequently, the debt securities are measured at fair value through profit or loss.

The Scheme holds equity securities, unit trusts and property trusts which had previously been designated at fair value through profit or loss. In accordance with AASB 9 these securities are mandatorily classified as fair value through profit or loss.

The Scheme holds derivatives which had previously been held for trading. In accordance with AASB 9 these securities are mandatorily classified as fair value through profit or loss.

For other receivables and payables, including amounts due to/from brokers, these balances are classified at amortised cost as they are deemed to be held in a business model with the objective to collect contractual cash flows through to maturity, and whose terms meet the SPPI criterion by virtue of the fact that payments pertain to only principal and/or simple interest and have a maturity of less than 12 months.

Liabilities

Derivative contracts that have a negative fair value are presented as liabilities at fair value through profit or loss.

The Scheme holds derivatives which had previously been held for trading. In accordance with AASB 9 these securities are mandatorily classified as fair value through profit or loss.

(ii) Impairment

AASB 9 introduces a new expected credit loss (ECL) approach to recognise and measure impairment, which replaces AASB 139's incurred loss approach. AASB 9 requires the Scheme to record an allowance for ECLs for all financial assets not held at fair value through profit or loss.

The ECL approach is based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Scheme expects to receive. The shortfall is then discounted at an approximation to the asset's original effective interest rate.

For receivables, due from brokers, margin accounts and applications receivable, the Scheme has applied the standard's simplified approach and has calculated ECLs based on lifetime expected credit losses. The Scheme has established a provision matrix that is based on the Scheme's historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

The Scheme considers a financial asset in default when contractual payment are 90 days past due. However, in certain cases, the Scheme may also consider a financial asset to be in default when internal or external information indicates that the Scheme is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Scheme.

(iii) Recognition/derecognition

The Scheme recognises financial assets and financial liabilities on the trade date at which it becomes party to the contractual agreement and recognises changes in fair value of the financial assets or financial liabilities from this date.

2 Summary of significant accounting policies (continued)

(b) Financial instruments (continued)

Investments are derecognised when the right to receive cash flows from the investments have expired or have been transferred and the Scheme has transferred substantially all of the risks and rewards of ownership.

(iv) Measurement

Financial assets and liabilities at fair value through profit or loss

Financial assets and liabilities at fair value through profit or loss are measured initially at fair value excluding any transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability. Transaction costs on financial assets and financial liabilities at fair value through profit or loss are expensed immediately. Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the financial assets or financial liabilities at fair value through profit or loss category are presented in the statement of comprehensive income within 'net gains/(losses) on financial instruments at fair value through profit or loss' in the period in which they arise.

Fair value in an active market

The fair value of financial assets and liabilities traded in active markets is based on their quoted market prices at the end of the reporting period without any deduction for estimated future selling costs. Financial assets and financial liabilities are priced using the last traded market price.

A financial instrument is regarded as quoted in active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

The Scheme's financial instruments that are valued based on active markets generally include listed instruments, ranging from listed equity and/or debt securities to listed derivatives, where applicable.

Fair value in an inactive or unquoted market

The fair value of financial assets and liabilities not traded in an active market is determined using valuation techniques. These include the use of recent arm's length market transactions, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

Where discounted cash flow techniques are used, estimated future cash flows are based on management's best estimates and the discount rate used in a market rate at the end of the reporting period applicable for an instrument with similar terms and conditions.

For other pricing models, inputs are based on market data at the end of the reporting period.

There may be a difference between the fair value at initial recognition and amounts determined using a valuation technique. If such a difference exists, the Scheme recognises the difference in the statement of comprehensive income to reflect a change in factors, including time, which market participants would consider in setting a price.

The fair value of derivatives that are not exchange-traded is estimated at the amount that the Scheme would receive or pay to terminate the contract at the end of the reporting period taking into account current market conditions (volatility and appropriate yield curve) and the current creditworthiness of the counterparties. The fair value of a forward contract is determined as a net present value of estimated future cash flows, discounted at appropriate market rates as at the valuation date. The fair value of an option contract is determined by applying the most appropriate option valuation model.

The Scheme's financial instruments that are valued based on inactive or unquoted markets generally include unlisted instruments from investments in unlisted unit trusts, unlisted equity and/or debt securities where applicable.

(v) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when, and only when, there is currently a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

2 Summary of significant accounting policies (continued)

(c) Net assets attributable to unitholders

Units are redeemable at the unitholders' option, however, applications and redemptions may be suspended by the Responsible Entity if it is in the best interests of the unitholders. The units can be put back to the Scheme at any time for cash based on the redemption price, which is equal to a proportionate share of the Scheme's net asset value attributable to the unitholders. The units are carried at the redemption amount that is payable at balance sheet date if the holder exercises the right to put the units back to the Scheme. This amount represents the expected cash flows on redemption of these units.

Units are classified as equity when they satisfy the following criteria under AASB 132 *Financial instruments: Presentation*:

- the puttable financial instrument entitles the holder to a pro-rata share of net assets in the event of the Scheme's liquidation;
- the puttable financial instrument is in the class of instruments that is subordinate to all other classes of instruments and class features are identical;
- the puttable financial instrument does not include any contractual obligations to deliver cash or another financial asset, or to exchange financial instruments with another entity under potentially unfavourable conditions to the Scheme, and it is not a contract settled in the Scheme's own equity instruments; and
- the total expected cash flows attributable to the puttable financial instrument over the life are based substantially on the profit or loss.

As at 30 June 2020 and 30 June 2019, net assets attributable to unitholders were classified as equity.

(d) Cash and cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short term, highly liquid investments with original maturities of three months or less from the date of acquisition that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts. Bank overdrafts, if any, are shown within borrowings in the statement of financial position.

Payments and receipts relating to the purchase and sale of investment securities are classified as cash flows from operating activities, as movements in the fair value of these securities represent the Scheme's main income generating activity.

(e) Investment income

Interest income and interest expenses are recognised in the statement of comprehensive income for all financial instruments on an effective interest method basis. Other changes in fair value for such instruments are recorded in accordance with the policies described in note 2(b).

Dividend income is recognised on the ex-dividend date.

Trust distributions are recognised on an entitlements basis.

Net gains/(losses) on financial assets and financial liabilities at fair value through profit or loss arising on a change in fair value are calculated as the difference between the fair value at the end of the reporting period and the fair value at the previous valuation point. Net gains/(losses) do not include interest or dividend/distribution income. Realised and unrealised gains/(losses) are shown in the notes to the financial statements.

(f) Expenses

All expenses, including Responsible Entity fees are recognised in the statement of comprehensive income on an accruals basis.

(g) Income tax

Under current legislation, the Scheme is not subject to income tax provided it attributes the entirety of its taxable income to its unitholders.

Financial instruments at fair value may include unrealised capital gains. Should such a gain be realised, that portion of the gain that is subject to capital gains tax will be distributed so that the Scheme is not subject to capital gains tax.

The benefit of imputation credits and foreign tax paid are passed on to unitholders.

2 Summary of significant accounting policies (continued)

(g) Income tax (continued)

The Scheme currently incurs withholding tax imposed by certain countries on investment income and capital gains. Such income is recorded net of withholding tax in the statement of comprehensive income.

(h) Distributions

In accordance with the Scheme's Constitution, the Scheme distributes income adjusted for amounts determined by the Responsible Entity, to unitholders by cash or reinvestment. Such distributions are recognised as payable when they are determined by the responsible entity of the Scheme.

(i) Functional and presentation currency

Items included in the Scheme's financial statements are measured using the currency of the primary economic environment in which it operates ("the functional currency"). This is the Australian dollar, which reflects the currency of the economy in which the Scheme competes for funds and is regulated. The Australian dollar is also the Scheme's presentation currency.

(j) Receivables

Receivables may include amounts for dividends, trust distributions, interest and securities sold where settlement has not yet occurred. Dividends and trust distributions are accrued when the right to receive payment is established. Interest is accrued at the end of each reporting period from the time of last payment in accordance with the policy set out in note 2(e) above. Amounts are generally received within 30 days of being recorded as receivables.

Receivables include such items as Reduced Input Tax Credits (RITC) and application monies receivable from unitholders.

These amounts are recognised initially at fair value and subsequently measured at amortised cost. At each reporting date, the Scheme shall measure the loss allowance on receivables at an amount equal to the lifetime expected credit losses if the credit risk has increased significantly since initial recognition. If, at the reporting date, the credit risk has not increased significantly since initial recognition, the Scheme shall measure the loss allowance at an amount equal to 12-month expected credit losses. Significant financial difficulties of the counterparty, probability that the counterparty will enter bankruptcy or financial reorganisation, and default in payments are all considered indicators that a loss allowance may be required. If the credit risk increases to the point that it is considered to be credit impaired, interest income will be calculated based on the gross carrying amount adjusted for the loss allowance. A significant increase in credit risk is defined by management as any contractual payment which is more than 30 days past due. Any contractual payment which is more than 90 days past due is considered credit impaired.

The amount of the impairment loss is recognised in profit or loss within other expenses. When a receivable for which an impairment allowance had been recognised becomes uncollectible in a subsequent period, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against other expenses in profit or loss.

(k) Payables

Payables include liabilities and accrued expenses owing by the Scheme which are unpaid as at the end of the reporting period.

Trades are recorded on trade date, and normally settled within two business days. Purchases of financial instruments that are unsettled at the end of each reporting period are included in payables.

The distribution amount payable to unitholders as at the end of each reporting period is recognised separately in the statement of financial position.

(l) Applications and redemptions

Applications received for units in the Scheme are recorded net of any entry fees payable prior to the issue of units in the Scheme. Redemptions from the Scheme are recorded gross of any exit fees payable after the cancellation of units redeemed.

Unit redemption prices are determined by reference to the net assets of the Scheme divided by the number of units on issue.

2 Summary of significant accounting policies (continued)

(m) Goods and Services Tax (GST)

Expenses of various services provided to the Scheme by third parties such as custodial services and investment management fees etc. are recognised net of the amount of associated GST, unless the GST incurred is not recoverable from the taxation authority. In this case, it is recognised as part of the related expense or cost item.

Accounts payable and receivable are stated inclusive of the GST receivable and payable. The net amount of GST recoverable from, or payable to, the taxation authority is included in receivables or payables in the statement of financial position.

Cash flows relating to GST are included in the statement of cash flows on a gross basis.

(n) Use of judgements and estimates

The preparation of the Scheme's financial statements requires it to make judgements, estimates and assumptions that affect the reported amounts of assets and liabilities. Uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability affected in the future. However, estimates are continually evaluated and based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The Scheme's financial instruments are valued primarily based on the prices provided by independent pricing services.

When the fair values of the reported financial instruments cannot be derived from active markets, they are determined using prices obtained from inactive or unquoted markets and/or other valuation techniques. The inputs to these valuation techniques (if applicable) are taken from observable markets to the extent practicable. Where observable inputs are not available, the inputs may be estimated based on a degree of judgements and assumptions in establishing fair values.

Where appropriate, the outcomes of the valuation techniques that are used in establishing fair values are validated using prices from observable current market transactions for similar instruments (without modification or repackaging) or based on relevant available observable market data.

The determination of what constitutes 'observable' requires significant judgement by the Scheme. The Scheme considers observable data to be market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

In addition, areas such as credit risk (both own and counterparty), volatilities and correlations require management to make estimates and judgements. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

For certain other financial instruments, including amounts due from/to brokers, accounts payable and accounts receivable, the carrying amounts approximate fair value due to the immediate or short-term nature of these financial instruments.

(o) New accounting standards, interpretations and other authoritative pronouncements

Certain new accounting standards and interpretations have been published that are not mandatory for the 30 June 2020 reporting period and have not yet been applied in the financial statements. The Directors' assessment of the impact of these new standards (to the extent relevant to the Scheme) and interpretations is set out below:

(i) AASB 2018-7 *Amendments to Australian Accounting Standards – Definition of Material* (effective for annual reporting periods beginning on or after 1 January 2020)

The International Accounting Standards Board ("IASB") has made amendments to IAS 1 Presentation of Financial Statements and IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors which use a consistent definition of materiality throughout International Financial Reporting Standards and the Conceptual Framework for Financial Reporting, clarify when information is material and incorporate some of the guidance in IAS 1 about immaterial information.

In particular, the amendments clarify:

- that the reference to obscuring information addresses situations in which the effect is similar to omitting or misstating that information, and that an entity assesses materiality in the context of the financial statements as a whole, and
- the meaning of 'primary users of general purpose financial statements' to whom those financial statements are directed, by defining them as 'existing and potential investors, lenders and other creditors' that must rely on general purpose financial statements for much of the financial information they need.

2 Summary of significant accounting policies (continued)

(o) New accounting standards, interpretations and other authoritative pronouncements (continued)

The amendments to the definition of material is not expected to have a significant impact on the Scheme's financial statements.

(ii) AASB *Conceptual Framework* (effective for annual reporting periods beginning on or after 1 January 2020)

The IASB has issued a revised Conceptual Framework which will be used in standard-setting decisions with immediate effect. Key changes include:

- increasing the prominence of stewardship in the objective of financial reporting
- reinstating prudence as a component of neutrality
- defining a reporting entity, which may be a legal entity, or a portion of an entity
- revising the definitions of an asset and a liability
- removing the probability threshold for recognition and adding guidance on derecognition
- adding guidance on different measurement basis; and
- stating that profit or loss is the primary performance indicator and that, in principle, income and expenses in other comprehensive income should be recycled where this enhances the relevance or faithful representation of the financial statements.

No changes will be made to any of the current accounting standards. However, entities that rely on the Framework in determining their accounting policies for transactions, events or conditions that are not otherwise dealt with under the accounting standards will need to apply the revised Framework for annual reporting periods commencing on or after 1 January 2020. The adoption of this Framework is not expected to have a material impact on the Scheme's accounting policies nor the amounts recognised in the financial statements.

(iii) AASB 2019-3 *Amendments to Australian Accounting Standards - interest rate benchmark reform* (effective for annual reporting periods beginning on or after 1 January 2020)

In 2018 IASB added a project to its agenda to consider the financial reporting implications of the Interbank Offer Rate ("IBOR") reform (transitioning to new/alternative risk-free rates ("RFR") based on real transactions). The IASB has set up its project in two phases.

The objective of the first phase was to ensure hedge accounting is not adversely affected by the uncertainties surrounding IBOR reform. Consequently, the IASB issued an amendment to IFRS 9, IAS 39, and IFRS 7 in September 2019 (effective January 1, 2020). The amendments modify some specific hedge accounting requirements to provide certain reliefs in connection with interest rate benchmark reform. The reliefs relate to hedge accounting and have the effect that IBOR reform should not generally cause hedge accounting to terminate. However, any hedge ineffectiveness should continue to be recorded in the income statement. Given the pervasive nature of hedges involving IBOR-based contracts, the reliefs will affect companies in all industries.

The second phase of the reform to Australian Accounting Standards addresses issues relating to the replacement of an existing benchmark rate with an alternative rate and is expected to be issued later this year. There are currently 2 alternatives under AASB 9: either (a) an accounting modification to the existing contract; or (b) a termination of the existing contract and the start of a new one. These alternatives would result in an impact in profit or loss either from reassessing the cash flows or from the derecognition of the instrument and the re-recognition of a new instrument.

The IASB has considered these alternatives as part of Phase 2 of its project to amend the accounting standards related to IBOR reform. Under its tentative decisions, the IASB will allow modifications in the context of the IBOR reform to be treated similar to floating rate financial instruments. Therefore, the interest rate will simply be changed with no profit or loss impact when the change occurs. These changes are expected to be made and issued by the accounting standard setters towards the end of this year, with an exposure draft expected in the first half of 2020.

In the meantime, the Scheme continues to follow the status of the IASB's IBOR reform project, and it will assess the impact for the Scheme as further information becomes available.

There are no other new accounting standards and other authoritative pronouncements that are expected to have a material impact on the Scheme.

2 Summary of significant accounting policies (continued)

(p) Rounding of amounts

The Scheme is an entity of the kind referred to in ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191 issued by the Australian Securities and Investments Commission ("ASIC"), relating to the "rounding off" of amounts in the financial statements. Amounts in the financial statements have been rounded off in accordance with that ASIC Instrument to the nearest thousand dollars, unless otherwise indicated.

(q) Comparatives

Where relevant, prior year comparatives have been restated to conform with current year presentation.

3 Interest income

	For the reporting period ended	
	30 June 2020	30 June 2019
	$'000	$'000
Cash and cash equivalents	**5**	19
Total interest income	**5**	19

4 Net gains/(losses) on financial instruments at fair value through profit or loss

Net gains/(losses) recognised in relation to financial assets and financial liabilities at fair value through profit or loss:

	For the reporting period ended	
	30 June 2020	30 June 2019
	$'000	$'000
Net gains/(losses) on derivatives at fair value through profit or loss	**24**	80
Net gains/(losses) on financial instruments at fair value through profit or loss	**(2,624)**	731
Total net gains/(losses) on financial instruments at fair value through profit or loss	**(2,600)**	811

5 Auditor's remunerations

During the reporting period the following fees were paid or payable for services provided by the auditor to the Scheme:

	For the reporting period ended	
	30 June 2020	30 June 2019
	$	$
KPMG		
Audit and other assurance services		
Audit of financial statements	**6,500**	6,500
Other regulatory audit services	**2,500**	2,500
Total remuneration for and other assurance services	**9,000**	9,000
Taxation services		
Taxation compliance services	**4,725**	4,725
Total remuneration for taxation services	**4,725**	4,725
Total remuneration of KPMG	**13,725**	13,725

Auditor's remuneration is paid by the Responsible Entity.

6 Net assets attributable to unitholders

As stipulated within the Scheme's Constitution, each unit represents a right to an individual share in the Scheme and does not extend to a right to the underlying assets of the Scheme. There are no separate classes of units and each unit has the same rights attaching to it as all other units of the Scheme.

Units are redeemed on demand at the unitholder's option. However, holders of these instruments typically retain them for the medium to long term. As such, the amount expected to be settled within twelve months after the end of the reporting period cannot be reliably determined

Movements in number of units and net assets attributable to unitholders during the reporting period were as follows:

			For the reporting period ended	
	30 June 2020	30 June 2019	**30 June 2020**	30 June 2019
	No. '000	No. '000	**$'000**	$'000
Balance as at 1 July	**16,017**	15,197	**17,133**	15,676
Applications	**147**	-	**100**	-
Redemptions	**(147)**	-	**(123)**	-
Units issued upon reinvestment of distributions	**703**	820	**756**	805
Distributions paid and payable	**-**	-	**(862)**	(736)
Total comprehensive income for the reporting period	**-**	-	**(2,273)**	1,388
Closing balance at 30 June	**16,720**	16,017	**14,731**	17,133

Capital risk management

The Scheme considers its net assets attributable to unitholders as capital. The amount of net assets attributable to unitholders can change significantly on a daily basis as the Scheme is subject to daily applications and redemptions at the discretion of unitholders.

Daily applications and redemptions are reviewed relative to the liquidity of the Scheme's underlying assets on a daily basis by the Responsible Entity. Under the terms of the Scheme's Constitution, the Responsible Entity has the discretion to reject an application for units and to defer or adjust a redemption of units if the exercise of such discretion is in the best interests of unitholders as a whole.

7 Distributions to unitholders

The distributions for the reporting period were as follows:

	For the reporting period ended			
	30 June 2020 $'000	**30 June 2020 CPU**	30 June 2019 $'000	30 June 2019 CPU
Distributions				
Distributions paid (31 December)	**323**	**1.970**	304	1.939
Distributions payable (30 June)	**539**	**3.221**	432	2.699
Total distributions	**862**	**5.191**	736	4.638

8 Financial assets at fair value through profit or loss

	As at	
	30 June 2020 $'000	30 June 2019 $'000
Financial assets at fair value through profit or loss		
Derivatives	**18**	31
Listed equities	**13,681**	16,486
Listed property trusts	**461**	-
Total financial assets at fair value through profit or loss	**14,160**	16,517

An overview of the risk exposures relating to financial assets at fair value through profit or loss is included in note 11.

9 Financial liabilities at fair value through profit or loss

	As at	
	30 June 2020 $'000	30 June 2019 $'000
Financial liabilities at fair value through profit or loss		
Derivatives	**76**	27
Total financial liabilities at fair value through profit or loss	**76**	27

An overview of the risk exposures relating to financial liabilities at fair value through profit or loss is included in note 11.

10 Derivative financial instruments

In the normal course of business the Scheme may enter into transactions in various derivative financial instruments with certain risks. A derivative is a financial instrument or other contract which is settled at a future date and whose value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index or other variable.

Derivative financial instruments require no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.

10 Derivative financial instruments (continued)

Derivative transactions include many different instruments, such as forwards, futures and options. Derivatives are considered to be part of the investment process and the use of derivatives is an essential part of the Scheme's portfolio management. Derivatives are not managed in isolation. Consequently, the use of derivatives is multifaceted and includes:

- hedging to protect an asset or liability of the Scheme against a fluctuation in market values or to reduce volatility;
- a substitution for trading of physical securities; and
- adjusting asset exposures within the parameters set in the investment strategy, and adjusting the duration of fixed interest portfolios or the weighted average maturity of cash portfolios.

While derivatives are used for trading purposes, they are not used to gear (leverage) a portfolio. Gearing a portfolio would occur if the level of exposure to the markets exceeds the underlying value of the Scheme.

The Scheme may hold the following derivative instruments:

(a) Futures

Futures are contractual obligations to buy or sell financial instruments on a future date at a specified price established in an organised market. The futures contracts are collateralised by cash or marketable securities. Changes in the value of futures contracts are usually settled net daily with the exchange. Interest rate futures are contractual obligations to receive or pay a net amount based on changes in interest rates at a future date at a specified price, established in an organised financial market.

(b) Options

An option is a contractual arrangement under which the seller (writer) grants the purchaser (holder) the right, but not the obligation, either to buy (a call option) or sell (a put option) at or by a set date or during a set period, a specific amount of securities or a financial instrument at a predetermined price. The seller receives a premium from the purchaser in consideration for the assumption of future securities price risk. Options held by the Scheme are exchange-traded. The Scheme is exposed to credit risk on purchased options to the extent of their carrying amount, which is their fair value. Options are settled on a gross basis.

The Scheme's derivative financial instruments at reporting period-end are detailed below:

		Fair Value	
30 June 2020	**Contract/ notional $'000**	**Assets $'000**	**Liabilities $'000**
Futures	**145**	**2**	**-**
Options	**(371)**	**16**	**76**
Total derivative instruments	**(226)**	**18**	**76**

		Fair Value	
30 June 2019	Contract/ notional $'000	Assets $'000	Liabilities $'000
Options	(418)	31	27
Total derivative instruments	(418)	31	27

An overview of the risk exposures relating to derivatives is included in note 11.

11 Financial risk management

(a) Objectives, strategies, policies and processes

The Scheme's activities may expose it to a variety of financial risks: market risk (including price risk, foreign exchange risk and interest rate risk), credit risk and liquidity risk.

The Scheme's overall risk management program focuses on ensuring compliance with the Scheme's Product Disclosure Statement and seeks to maximise the returns derived for the level of risk to which the Scheme is exposed. Financial risk management is carried out by an Investment Manager ("the Investment Manager") under policies approved by the Board of Directors of the Responsible Entity ("the Board").

The Scheme uses different methods to measure different types of risk to which it is exposed. These methods include sensitivity analysis in the case of interest rate, foreign exchange and other price risks, and ratings analysis for credit risk.

As part of its risk management strategy, the Scheme may use derivatives and other investments, including share price and bond futures, interest rate swaps and forward currency contracts, to manage exposures resulting from changes in interest rates, foreign currencies, equity price risks, and exposures arising from forecast transactions.

The World Health Organisation ("WHO") declared COVID-19 a pandemic on 11 March 2020. At the date of this report, whilst there has not been significant impact on the investment service of the Scheme, there has been an impact on security prices. Although the pandemic would not change the financial position at 30 June 2020, the impact going forward is unclear in terms of business disruption and the economic environment. The Scheme has a program of measures in place to manage and respond to the risk as the situation evolves.

(b) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: price risk, foreign exchange risk and interest rate risk. Market risk is managed and monitored using sensitivity analysis, and minimised through ensuring that all investment activities are undertaken in accordance with established mandates and investment strategies.

The market risk disclosures are prepared on the basis of the Scheme's direct investments and not on a look-through basis for investments held in the Scheme.

The sensitivity of the Scheme's net assets attributable to unitholders (and profit/(loss) to price risk, foreign exchange risk and interest rate risk is measured by the reasonably possible movements approach. This approach is determined based on management's best estimate, having regard to a number of factors, including historical levels of changes in interest rates and foreign exchange rates, historical correlation of the Scheme's investments with the relevant benchmarks and market volatility. However, actual movements in the risk variables may be greater or less than anticipated due to a number of factors, including unusually large market shocks resulting from changes in the performance of the economies, markets and securities in which the Scheme invests. As a result, historic variations in the risk variables are not a definitive indicator of future variations in the risk variables.

At 30 June 2020 and 30 June 2019, the overall market exposures were as follows:

	As at	
	30 June 2020 $'000	30 June 2019 $'000
Derivatives assets at fair value through profit or loss	**18**	31
Derivatives liabilities at fair value through profit or loss	**(76)**	(27)
Securities at fair value through profit or loss	**14,142**	16,486
	14,084	16,490

(i) Price risk

Price risk is the risk that the fair value or future cash flows of equities will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or by factors affecting all similar financial instruments traded in the market.

11 Financial risk management (continued)

(b) Market risk (continued)

(i) Price risk (continued)

Price risk exposure arises from the Scheme's investment portfolio. The investments are classified on the statement of financial position as at fair value through profit or loss. All securities investments present a risk of loss of capital. The maximum risk resulting from financial instruments is determined by the fair value of the financial instruments.

The Investment Manager mitigates this price risk through diversification and a careful selection of securities and other financial instruments within specified limits set by the Board.

The Scheme's overall market positions are monitored on a regular basis by the Scheme's Investment Manager. This information and the compliance with the Scheme's Product Disclosure Statement are reported to the relevant parties on a regular basis as deemed appropriate such as the compliance manager, other key management personnel, compliance committees and ultimately the Board.

The Investment Manager continues to consider the potential implications of COVID-19, which may include volatility in valuation of investments. However, at this stage the financial impact of the virus is not able to be estimated due to the general level of uncertainty.

At 30 June 2020 and 30 June 2019, if the equity prices had increased/(decreased) by the percentage indicated below, with all other variables held constant, the net assets attributable to unitholders (and profit/(loss)) before finance costs attributable to unitholders) would have changed by the following amounts, approximately and respectively:

	As at 30 June 2020		As at 30 June 2019	
	Increased by 10% $'000	**Decreased by 10% $'000**	Increased by 5% $'000	Decreased by 5% $'000
Increase/(decrease) in net assets attributable to unitholders (and profit/(loss))	1,408	(1,408)	825	(825)

(ii) Foreign exchange risk

There was no significant direct foreign exchange risk in this Scheme as at 30 June 2020 (2019: Nil).

(iii) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Responsible Entity establishes interest rate management strategies to manage the risk of the Scheme. This includes managing exposures around the benchmark and hedging exposures through the use of derivatives.

In accordance with the Scheme's policy, the Responsible Entity via the Investment Manager monitors the Scheme's overall interest sensitivity on a daily basis and the Directors of the Responsible Entity review it on a quarterly basis.

Interest rate risk is not considered to be significant to the Scheme except in relation to investments in interest bearing securities. The Scheme does not have any investments in interest bearing securities at 30 June 2020 and 30 June 2019.

However, the Scheme does hold cash for liquidity and transactional purposes and this cash is held at floating rates of interest. As a result, the Scheme is not subject to a material exposure to interest rate risks due to fluctuations in the levels of market interest rates.

11 Financial risk management (continued)

(c) Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Credit risk primarily arises from investments in debt securities and from trading derivative products. Other credit risk arises from cash and cash equivalents, and deposits with banks and other financial institutions.

With respect to credit risk arising from the financial assets of the Scheme, other than derivatives, the Scheme's exposure to credit risk arises from default of the counterparty, with the current exposure equal to the fair value of these investments as disclosed in the statement of financial position. This does not represent the maximum risk exposure that could arise in the future as a result of changes in values, but best represents the current maximum exposure at the end of the reporting period.

Credit risk arising from derivative financial instruments is, at any time, limited to those with positive fair values.

All transactions in listed securities are settled/paid for upon delivery using approved brokers. The risk of default is considered low, as delivery of securities sold is only made once the broker has received payment. Payment is made once purchase of the securities has been received by the broker. The trade will fail if either party fails to meet its obligations.

The Scheme holds no collateral as security or any other credit enhancements. There are no financial assets that are past due or impaired, or would otherwise be past due or impaired.

Counterparty credit limits and the list of authorised brokers are reviewed by the relevant parties within the Responsible Entity on a regular basis as deemed appropriate.

In accordance with the Scheme's policy, the Investment Manager monitors the Scheme's credit position on a regular basis. This information and the compliance with the Scheme's policy are reported to the relevant parties on a regular basis as deemed appropriate such as the compliance manager, other key management personnel, compliance committees and ultimately the Board. All contracts are with counterparties included in the Board's Approved Counterparties list.

There was no significant credit risk in the Scheme as at 30 June 2020 (2019: Nil).

(d) Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. This risk is controlled through the Scheme's investment in financial instruments, which under normal market conditions are readily convertible to cash. In addition, the Scheme maintains sufficient cash and cash equivalents to meet normal operating requirements.

The Scheme may be exposed to daily cash redemptions of redeemable units and daily margin calls on derivatives. It therefore primarily holds investments that are traded in active markets and can be readily disposed of.

The Scheme's investments may include listed securities that are considered readily realisable, as they are listed on recognised stock exchanges.

The Scheme may invest in investments in unlisted unit trusts that expose the Scheme to the risk that the Scheme or Investment Manager of those trusts may be unwilling or unable to fulfil the redemption requests within the timeframe requested by the Scheme.

The Scheme may, from time to time, invest in derivative contracts traded over the counter, which are not traded in an organised market and may be illiquid. As a result, the Scheme may not be able to quickly liquidate its investments in these instruments at an amount close to their fair value to meet its liquidity requirements or to respond to specific events such as a deterioration in the creditworthiness of any particular issuer. No such investments were held at the end of the reporting period.

The Scheme's policy is to hold a significant proportion of its investments in liquid assets.

Under the terms of its Constitution, the Scheme has the ability to manage liquidity risk by delaying redemptions to unitholders, if necessary, until the funds are available to pay them.

Units are redeemed on demand at the unitholders option. However, the Board of Directors does not envisage that the contractual maturity disclosed in the table below will be representative of the actual cash outflows, as holders of these instruments typically retain them for the medium to long term.

11 Financial risk management (continued)

(d) Liquidity risk (continued)

In accordance with the Scheme's policy, the Investment Manager monitors the Scheme's liquidity position on a regular basis. This information and the compliance with the Scheme's policy are reported to the relevant parties on a regular basis as deemed appropriate such as compliance manager, other key management personnel, compliance committees and ultimately the Board.

(i) Maturity of non-derivative financial liabilities

The table below analyses the Scheme's financial liabilities into relevant maturity groupings based on the remaining period at the end of the reporting period to the contractual maturity date. The amounts in the table are the contractual undiscounted cash flows.

	Less than 1 month $'000	**1-3 months $'000**	**3-12 months $'000**	**More than 12 months $'000**
At 30 June 2020				
Distributions payable	**538**	**-**	**-**	**-**
Payables	**383**	**-**	**-**	**-**
Financial liabilities at fair value through profit or loss	**-**	**76**	**-**	**-**
Total financial liabilities	**921**	**76**	**-**	**-**

	Less than 1 month $'000	1-3 months $'000	3-12 months $'000	More than 12 months $'000
At 30 June 2019				
Distributions payable	432	-	-	-
Payables	1,261	-	-	-
Financial liabilities at fair value through profit or loss	20	7	-	-
Total financial liabilities	1,713	7	-	-

As disclosed above, the Scheme predominantly invests in liquid assets that it expects to be able to liquidate within 7 days or less. Liquid assets include cash and cash equivalents, listed equities, listed property trusts and derivatives. As at 30 June 2020 , these assets amounted to $15,535,332 (2019: $18,387,690).

(e) Estimation of fair values of financial assets and liabilities

The carrying amounts of all the Scheme's financial assets and financial liabilities at the end of the reporting period approximated their fair values.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Scheme's accounting policy on fair value measurement is set out in note 2(b). The methods and assumptions used in the determination of the fair value of each class of financial instruments are also set out in note 2(b).

Note 2(n) outlines further the nature of management's judgements, estimates and assumptions that might have been used in the determination of the fair values of these financial instruments.

11 Financial risk management (continued)

(f) Fair value hierarchy

The Scheme is required to classify fair value measurements using a fair value hierarchy that reflects the subjectivity of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices); quoted prices for similar securities in active and/or inactive markets; market-corroborated inputs; inputs that are developed based on available market data and reflect assumptions that markets would use when pricing similar securities.
- Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes "observable" requires significant judgement by the Scheme. The Scheme considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The table below sets out the Scheme's financial assets and liabilities (by class) measured at fair value according to the fair value hierarchy at the reporting date.

All fair value measurements disclosed are recurring fair value measurements.

At 30 June 2020	**Level 1 $'000**	**Level 2 $'000**	**Level 3 $'000**	**Total $'000**
Financial assets				
Listed equities	**13,681**	**-**	**-**	**13,681**
Listed property trusts	**461**	**-**	**-**	**461**
Futures	**2**	**-**	**-**	**2**
Options	**16**	**-**	**-**	**16**
Total	**14,160**	**-**	**-**	**14,160**
Financial liabilities				
Options	**76**	**-**	**-**	**76**
Total	**76**	**-**	**-**	**76**

At 30 June 2019	Level 1 $'000	Level 2 $'000	Level 3 $'000	Total $'000
Financial assets				
Listed equities	16,486	-	-	16,486
Options	31	-	-	31
Total	16,517	-	-	16,517
Financial liabilities				
Options	27	-	-	27
Total	27	-	-	27

The pricing for the majority of the Scheme's investments is generally sourced from independent pricing sources, the relevant Investment Managers or reliable brokers' quotes.

11 Financial risk management (continued)

(f) Fair value hierarchy (continued)

Investments whose values are based on quoted market prices in active markets, e.g. recognised stock exchanges, and therefore classified within level 1, include active listed equities and exchange traded derivatives.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. The observable inputs include prices and/or those derived from prices. The level 2 instruments include investment-grade corporate bonds, and over-the-counter derivatives. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Level 2 investments could include those that are not traded in active markets and/or are subject to transfer restrictions (e.g. redemption restrictions). Valuations for these investments may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information. Typically, prices of units in unlisted managed investment trusts that are either published on the investment manager's website and/or circulated among market participants as executable quotes are categorised as level 2.

Investments classified within level 3 have significant unobservable inputs, as they are infrequently traded. Level 3 instruments include certain unlisted unit trusts and corporate debt securities. As observable prices are not available for these securities, valuation techniques are used to derive fair value.

There were no transfers between any levels for the year ended 30 June 2020 and 30 June 2019.

There were no level 2 or level 3 instruments as at 30 June 2020 and 30 June 2019.

12 Related party transactions

(a) Responsible Entity

The Responsible Entity of Perennial Value Active Plus Shares Trust is Perennial Investment Management Limited.

The immediate parent entity and the ultimate controlling entity of Perennial Investment Management Limited is Perennial Value Management Limited.

(b) Directors

Key management personnel includes persons who were Directors of Perennial Investment Management Limited at any time during the reporting period.

(c) Other key management personnel

There were no other persons with responsibility for planning, directing and controlling the activities of the Scheme, directly or indirectly during the reporting period.

(d) Key management personnel unitholdings

As at 30 June 2020 and 30 June 2019, no Directors of the Responsible Entity held units in the Scheme.

(e) Key management personnel compensation

Key management personnel are remunerated by Perennial Value Management Limited. Payments made from the Scheme to Perennial Investment Management Limited do not include any amount that is directly attributable to key management personnel remuneration.

12 Related party transactions (continued)

(f) Key management personnel loan disclosures

The Scheme has not made, guaranteed or secured, directly or indirectly, any loans to the key management personnel or their personally related entities at any time during the reporting period.

(g) Other transactions within the Scheme

From time to time, Directors of the Responsible Entity, or their Director related entities, may invest in or withdraw from the Scheme. These investments or withdrawals are on the same terms and conditions as those entered into by other Scheme investors and are trivial in nature.

(h) Responsible Entity's/Investment Manager's fees and other transactions

Under the terms of the Scheme's Constitution, the Responsible Entity is entitled to receive a maximum management fee of 0.92% per annum. The management fee charged by the Responsible Entity for the reporting period was 0.92% per annum (2019: 0.92%).

Expenses in connection with the preparation of accounting records and the maintenance of the unit register are not reimbursed in accordance with the Scheme's Constitution.

	756	805

14 Events occurring after the reporting period

On 27th August 2020 Perennial Value Active Plus Share Trust formally changed its name to Perennial Concentrated Australia Shares Trust.

There are no other items, transactions or events of a material and unusual nature have arisen between the end of the financial period and the date of this report, which are likely, in the opinion of the Directors, to affect significantly the operations of the Scheme, the results of those operations, or the state of affairs of the Scheme in future financial years.

15 Contingent assets and liabilities and commitments

There are no outstanding contingent assets and liabilities or commitments as at 30 June 2020 and 30 June 2019.

Directors' declaration

In the opinion of the Directors of the Responsible Entity:

(a) the financial statements and notes set out on pages 6 to 28 are in accordance with the *Corporations Act 2001*, including:

(i) complying with Australian Accounting Standards, the *Corporations Regulations 2001* and other mandatory professional reporting requirements; and

(ii) giving a true and fair view of the Scheme's financial position as at 30 June 2020 and of its performance, as represented by the results of its operations and cash flows, for the reporting period ended on that date.

(b) there are reasonable grounds to believe that the Scheme will be able to pay its debts as and when they become due and payable.

(c) the financial statements are in accordance with the Scheme's Constitution.

(d) note 2(a) confirms that the financial statements also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board.

This declaration is made in accordance with a resolution of the Directors.

KPMG

Independent Auditor's Report

To the unitholders of Perennial Value Active Plus Shares Trust

Opinion

We have audited the ***Financial Report*** of Perennial Value Active Plus Shares Trust (the Scheme).

In our opinion, the accompanying ***Financial Report*** of the Scheme is in accordance with the *Corporations Act 2001*, including:

- giving a true and fair view of the Scheme's financial position as at 30 June 2020 and of its financial performance for the year ended on that date; and
- complying with *Australian Accounting Standards* and the *Corporations Regulations 2001*.

The ***Financial Report*** comprises:

- Statement of financial position as at 30 June 2020;
- Statement of comprehensive income, Statement of changes in equity, and Statement of cash flows for the year then ended;
- Notes including a summary of significant accounting policies; and
- Directors' Declaration.

Basis for opinion

We conducted our audit in accordance with *Australian Auditing Standards.* We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the Financial Report* section of our report.

We are independent of the Scheme in accordance with the *Corporations Act 2001* and the ethical requirements of the *Accounting Professional and Ethical Standards Board's APES 110 Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the Financial Report in Australia. We have fulfilled our other ethical responsibilities in accordance with the Code.

Other Information

Other Information is financial and non-financial information in the Scheme's annual reporting which is provided in addition to the Financial Report and the Auditor's Report. The Directors of Perennial Investment Management Limited (the Responsible Entity) are responsible for the Other Information.

Our opinion on the Financial Report does not cover the Other Information and, accordingly, we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the Financial Report, our responsibility is to read the Other Information. In doing so, we consider whether the Other Information is materially inconsistent with the Financial Report or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

KPMG, an Australian partnership and a member firm of the KPMG network of independent member firms affiliated with KPMG International Cooperative ("KPMG International"), a Swiss entity.

Liability limited by a scheme approved under Professional Standards Legislation.

KPMG

We are required to report if we conclude that there is a material misstatement of this Other Information, and based on the work we have performed on the Other Information that we obtained prior to the date of this Auditor's Report we have nothing to report.

Responsibilities of the Directors for the Financial Report

The Directors are responsible for:

- preparing the Financial Report that gives a true and fair view in accordance with *Australian Accounting Standards* and the *Corporations Act 2001;*
- implementing necessary internal control to enable the preparation of a Financial Report that gives a true and fair view and is free from material misstatement, whether due to fraud or error; and
- assessing the Scheme's ability to continue as a going concern and whether the use of the going concern basis of accounting is appropriate. This includes disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless they either intend to liquidate the Scheme or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the Financial Report

Our objective is:

- to obtain reasonable assurance about whether the Financial Report as a whole is free from material misstatement, whether due to fraud or error; and
- to issue an Auditor's Report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with *Australian Auditing Standards* will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error. They are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the Financial Report.

A further description of our responsibilities for the audit of the Financial Report is located at the *Auditing and Assurance Standards Board* website at: http://www.auasb.gov.au/auditors_responsibilities/ar4.pdf. This description forms part of our Auditor's Report.
