Independent auditor's report to the unitholders of Perennial Value Wealth Defender

These financial statements cover Perennial Value Wealth Defender Australian Shares Trust as an individual entity.

The Responsible Entity of Perennial Value Wealth Defender Australian Shares Trust was Perennial Investment Management Limited (ABN 13 108 747 637). The Responsible Entity's registered office is Level 27, 88 Phillip Street, Sydney, NSW 2000.

# **Directors' report**

The Directors of Perennial Investment Management Limited, the Responsible Entity of Perennial Value Wealth Defender Australian Shares Trust, present their report together with the financial statements of Perennial Value Wealth Defender Australian Shares Trust ("the Scheme") for the reporting period 1 July 2021 to 30 June 2022 ("the reporting period").

The Scheme was a registered managed investment scheme domiciled in Australia.

The Scheme ceased operation on 30 June 2022. The Scheme has nil assets and nil liabilities effective on 30 June 2022. This is the final financial report to be issued by the Scheme.

# **Responsible Entity**

The Responsible Entity of Perennial Value Wealth Defender Australian Shares Trust was Perennial Investment Management Limited (ABN 13 108 747 637). The Responsible Entity's registered office is Level 27, 88 Phillip Street, Sydney, NSW 2000.

# **Principal activities**

Up until its closure, the Scheme continued to invest funds in accordance with the following investment objective:

To outperform the S&P/ASX 300 Accumulation Index by investing in a diversified portfolio of Australian shares and using protection strategies to dynamically protect the portfolio through market cycles, thereby reducing the magnitude of significant negative returns in sharply falling equity markets.

The investment objective is as disclosed in accordance with the provisions of the Scheme's Constitution.

The Scheme did not have any employees during the reporting period.

There were no other significant changes in the nature of the Scheme's activities during the reporting period.

# Directors

The following persons held office as Directors of Perennial Investment Management Limited during the reporting period or since the end of the reporting period and up to the date of this report, unless otherwise stated:

- A. Patterson
- C. Love
- M. Bennett

# Review and results of operations

These are the final financial statements for the Scheme, which has terminated. During the period prior to its termination, the Scheme continued to invest funds in accordance with target asset allocations as set out in the governing documents of the Scheme and in accordance with the provisions of the Scheme's Constitution.

The performance of the Scheme, as represented by the results of its operations, was as follows:

	For the reporting period ended		
	<b>30 June</b> 30		
	2022	2021	
Total comprehensive income/(loss) for the period (\$)	(51,793)	5,923,853	
Distributions paid and payable to unitholders (\$)	16,561	160,000	
Distributions (cents per unit - "CPU")	0.118	0.674	

Distributions to unitholders are disclosed in note 8 of the financial statements.

# **Directors' report (continued)**

# Significant changes in state of affairs

Non-financial risks emerging from global inflation hikes, tightening monetary policies and global geopolitical tension have been identified through the application of the Responsible Entity's risk management framework.

The Scheme ceased operations with all investments sold, and monies returned to the unitholders through a final redemption effective 27 May 2022.

In the opinion of the Directors, there were no other siginicant changes in the state of affairs of the Scheme that occurred during the period.

#### Indemnification and insurance of officers and auditors

There is a Directors' and Officers' insurance policy which indemnifies the Directors and Officers of Perennial Investment Management Limited against liabilities to persons outside Perennial Investment Management Limited that arise out of the performance of their normal duties. The premiums have not been paid for out of the assets of the Scheme. The auditor of the Scheme is in no way indemnified out of the assets of the Scheme.

# Fees paid to and interests held in the Scheme by the Responsible Entity or its related parties

Fees paid to the Responsible Entity and its related parties out of the Scheme property during the reporting period are disclosed in note 13 of the financial statements.

No fees were paid out of Scheme property to the Directors of the Responsible Entity during the reporting period.

The number of interests in the Scheme held by the Responsible Entity or its associates as at the end of the reporting period are disclosed in note 13 of the financial statements.

#### Interests in the Scheme

The movements in units on issue in the Scheme during the reporting period are disclosed in note 7 of the financial statements.

The value of the Scheme's assets and liabilities is disclosed in the statement of financial position and derived using the basis set out in note 2 of the financial statements.

# Environmental regulation

The operations of the Scheme are not subject to any particular or significant environmental regulations under a Commonwealth, State or Territory Law.

Environmental, social and governance (ESG) risks, including climate change, are identified in accordance with the Responsible Entity's risk management framework.

#### Events occurring after the reporting period

There are no likely developments for this Scheme as it was wound up as at 30 June 2022.

#### Rounding of amounts to the nearest dollar

The Scheme is an entity of the kind referred to in ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191, issued by the Australian Securities and Investments Commission ("ASIC"), relating to the "rounding off" of amounts in the Directors' report. Amounts in the Directors' report have been rounded off in accordance with that ASIC Instrument to the nearest dollar, unless otherwise indicated.

# Directors' report (continued)

# Auditor's independence declaration

The lead auditor's independence declaration, as required under section 307C of the Corporations Act 2001, is set out on page 5 and forms part of the Directors' Report for the year ended 30 June 2022.

Signed in accordance with a resolution of the Directors of Perennial Investment Management Limited.

A. Patte Dir

Sydney 21 September 2022

# Lead Auditor's Independence Declaration under Section 307C of the Corporations Act 2001

# To the Directors of Perennial Investment Management Limited, the Responsible Entity of Perennial Value Wealth Defender Australian Shares Trust

I declare that, to the best of my knowledge and belief, in relation to the audit of Perennial Value Wealth Defender Australian Shares Trust for the financial year ended 30 June 2022 there have been:

- i. no contraventions of the auditor independence requirements as set out in the *Corporations Act 2001* in relation to the audit; and
- ii. no contraventions of any applicable code of professional conduct in relation to the audit.

# 1 General information

These financial statements cover Perennial Value Wealth Defender Australian Shares Trust ("the Scheme") as an individual entity. The Scheme was constituted on 30 May 2014.

The Responsible Entity of the Scheme was Perennial Investment Management Limited ("the Responsible Entity"). The Responsible Entity's registered office is Level 27, 88 Phillip Street, Sydney, NSW 2000. The Responsible Entity's ABN is 13 108 747 637.

The Scheme was an Australian registered scheme.

The Responsible Entity was incorporated and domiciled in Australia.

The financial statements are presented in the Australian currency.

The financial statements are for the period 1 July 2021 to 30 June 2022 ("the reporting period").

The Scheme ceased operations with all investments sold, and monies returned to the unitholders through a final redemption effective 27 May 2022.

The financial statements were authorised for issue by the Directors on 21 September 2022. The Directors of the Responsible Entity have the power to amend and reissue the financial statements.

# 2 Summary of significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all reporting periods presented, unless otherwise stated in the following text.

# (a) Basis of preparation

These general purpose financial statements have been prepared in accordance with Australian Accounting Standards, other authoritative pronouncements of the Australian Accounting Standards Board and the *Corporations Act 2001* in Australia.

The Scheme was a for-profit entity for the purposes of preparing the financial statements.

The statement of financial position is presented on a liquidity basis. Assets and liabilities are presented in decreasing order of liquidity and are not distinguished between current and non-current. This financial statement is not prepared on a going concern basis given the Scheme has ceased operation since 30 June 2022, and the Scheme has no remaining assets or liabilities.

The financial report for the comparative reporting period was prepared on a going concern basis.

The change in basis of preparation has resulted in no impact on the classification and measurements of the assets and liabilities. No additional provisions have been recognised in relation to the costs expected to be incurred in winding up the Scheme as at 30 June 2022.

# Compliance with Australian Accounting Standards and International Financial Reporting Standards

The financial statements of the Scheme comply with Australian Accounting Standards as issued by the Australian Accounting Standards Board and also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board.

# New/Amended standards and Interpretations adopted by the Scheme

There are no standards, interpretations or amendments to existing standards that are effective for the first time for the financial year beginning 1 July 2021 that have a material impact on the amounts recognised in the prior periods or will affect the current or future periods.

# (b) Financial instruments

# (i) Classification

Classification and measurement of debt securities is driven by the Scheme's investment strategy for managing the financial assets and the contractual cash flow characteristics of the financial assets.

A debt instrument is measured at amortised cost if the objective of the investment strategy is to hold the financial asset for the collection of the contractual cash flows and the contractual cash flows under the instrument represent solely payments of principal and interest ("SPPI").

A debt instrument is measured at fair value through other comprehensive income if the objective of the investment strategy is to hold the financial asset both to collect contractual cash flows from SPPI and to sell.

All other debt instruments must be recognised at fair value through profit or loss. A Scheme may however, at initial recognition, irrevocably designate a financial asset as measured at fair value through profit or loss if doing so eliminates or significantly reduces a measurement or recognition inconsistency.

The Scheme did not hold any debt instruments as at 30 June 2022 and 30 June 2021.

Derivative and equity instruments are measured at fair value through profit or loss unless, for equity instruments not held for trading, an irrevocable option is taken to measure at fair value through other comprehensive income.

# Assets

The Scheme classifies its financial assets in the following measurement categories:

- those to be measured at fair value through profit or loss; and
- those to be measured at amortised cost.

The Scheme's portfolio of financial assets has been managed and performance is evaluated on a fair value basis in accordance with the Scheme's documented investment strategy. The Responsible Entity evaluates the information about these financial assets on a fair value basis together with other related financial information.

For equity securities and derivatives such as futures and foreign currency contracts, the contractual cash flows of these instruments do not represent SPPI. Consequently, these investments have been measured at fair value through profit or loss.

For debt securities, the contractual cash flows are SPPI, however they are neither held for collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving the Scheme's investment strategy. Consequently, the debt securities have been measured at fair value through profit or loss.

The Scheme held equity securities, and property trusts which had previously been designated at fair value through profit or loss. In accordance with AASB 9 these securities are mandatorily classified as fair value through profit or loss.

The Scheme held derivatives which had previously been classified as held for trading. In accordance with AASB 9 these securities are mandatorily classified as fair value through profit or loss.

For other receivables and payables, including amounts due to/from brokers, these balances are classified at amortised cost as they are deemed to be held in an investment strategy with the objective to collect contractual cash flows through to maturity, and whose terms meet the SPPI criterion by virtue of the fact that payments pertain to only principal and/or simple interest and have a maturity of less than 12 months.

# Liabilities

Derivative contracts that have a negative fair value are presented as liabilities at fair value through profit or loss.

The Scheme held derivatives which had previously been classified as held for trading. In accordance with AASB 9 these securities are mandatorily classified as fair value through profit or loss.

# (b) Financial instruments (continued)

# (ii) Impairment

AASB 9 requires the Scheme to record an allowance for expected credit losses (ECLs) for all financial assets not held at fair value through profit or loss.

The ECL approach is based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Scheme expects to receive. The shortfall is then discounted at an approximation to the asset's original effective interest rate.

For receivables, due from brokers, margin accounts and applications receivable, the Scheme has applied the standard's simplified approach and has calculated ECLs based on lifetime ECLs. The ECL approach is based on the Scheme's historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

The Scheme considered a financial asset in default when contractual payment are 90 days past due. However, in certain cases, the Scheme may also consider a financial asset to be in default when internal or external information indicates that the Scheme is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Scheme.

#### (iii) Recognition/derecognition

The Scheme recognises financial assets and financial liabilities on the trade date at which it becomes party to the contractual agreement and recognises changes in fair value of the financial assets or financial liabilities from this date.

Investments are derecognised when the right to receive cash flows from the investments have expired or have been transferred and the Scheme has transferred substantially all of the risks and rewards of ownership.

# (iv) Measurement

#### Financial assets and liabilities at fair value through profit or loss

Financial assets and liabilities at fair value through profit or loss are measured initially at fair value excluding any transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability. Transaction costs on financial assets and financial liabilities at fair value through profit or loss are expensed immediately. Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the financial assets or financial liabilities at fair value through profit or loss at fair value through profit or loss category are presented in the statement of comprehensive income within 'net gains/(losses) on financial instruments at fair value through profit or loss' in the period in which they arise.

# Fair value in an active market

The fair value of financial assets and liabilities traded in active markets is based on their quoted market prices at the end of the reporting period without any deduction for estimated future selling costs. Financial assets and financial liabilities were priced using the last traded market price.

A financial instrument is regarded as quoted in active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

The Scheme's financial instruments that were valued based on active markets generally include listed instruments, ranging from listed equity and/or debt securities to listed derivatives, where applicable.

#### Fair value in an inactive or unquoted market

The fair value of financial assets and liabilities not traded in an active market is determined using valuation techniques. These include the use of recent arm's length market transactions, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

Where discounted cash flow techniques were used, estimated future cash flows are based on management's best estimates and the discount rate used in a market rate at the end of the reporting period applicable for an instrument with similar terms and conditions.

# (b) Financial instruments (continued)

For other pricing models, inputs are based on market data at the end of the reporting period.

There may be a difference between the fair value at initial recognition and amounts determined using a valuation technique. If such a difference exists, the Scheme recognised the difference in the statement of comprehensive income to reflect a change in factors, including time, which market participants would consider in setting a price.

The fair value of derivatives that are not exchange-traded was estimated at the amount that the Scheme would receive or pay to terminate the contract at the end of the reporting period taking into account current market conditions (volatility and appropriate yield curve) and the current creditworthiness of the counterparties. The fair value of a forward contract was determined as a net present value of estimated future cash flows, discounted at appropriate market rates as at the valuation date. The fair value of an option contract was determined by applying the most appropriate option valuation model.

The Scheme's financial instruments that are valued based on inactive or unquoted markets generally include unlisted instruments from investments in unlisted unit trusts, unlisted equity and/or debt securities where applicable.

# (v) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when, and only when, there is currently a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

# (c) Net assets attributable to unitholders

Units could be put back to the Scheme for cash based on the redemption price, which was equal to a proportionate share of the Scheme's net asset value attributable to the unitholders. The units were carried at the redemption amount that is payable at balance sheet date if the holder exercises the right to put the units back to the Scheme. This amount represents the expected cash flows on redemption of these units.

Units were classified as equity when they satisfied the following criteria under AASB 132 Financial instruments: Presentation:

- the puttable financial instrument entitles the holder to a pro-rata share of net assets in the event of the Scheme's liquidation;
- the puttable financial instrument is in the class of instruments that is subordinate to all other classes of instruments and class features are identical;
- the puttable financial instrument does not include any contractual obligations to deliver cash or another financial asset, or to exchange financial instruments with another entity under potentially unfavourable conditions to the Scheme, and it is not a contract settled in the Scheme's own equity instruments; and
- the total expected cash flows attributable to the puttable financial instrument over the life are based substantially on the profit or loss.

As at 30 June 2022 and 30 June 2021, net assets attributable to unitholders were classified as equity.

#### (d) Cash and cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short term, highly liquid investments with original maturities of three months or less from the date of acquisition that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts. Bank overdrafts, if any, are shown within borrowings in the statement of financial position.

Payments and receipts relating to the purchase and sale of investment securities are classified as cash flows from operating activities, as movements in the fair value of these securities represent the Scheme's main income generating activity.

#### (e) Investment income

Interest income and interest expenses are recognised in the statement of comprehensive income for all financial instruments on an effective interest method basis. Other changes in fair value for such instruments are recorded in accordance with the policies described in note 2(b).

# (e) Investment income (continued)

Dividend income is recognised on the ex-dividend date.

Trust distributions are recognised on an entitlements basis.

Net gains/(losses) on financial assets and financial liabilities at fair value through profit or loss arising on a change in fair value are calculated as the difference between the fair value at the end of the reporting period and the fair value at the previous valuation point. Net gains/(losses) do not include interest or dividend/distribution income. Realised and unrealised gains/(losses) are shown in the notes to the financial statements.

# (f) Expenses

All expenses, including Responsible Entity fees are recognised in the statement of comprehensive income on an accruals basis.

# (g) Income tax

Under current legislation, the Scheme is not subject to income tax provided it attributes the entirety of its taxable income to its unitholders.

Financial instruments at fair value may include unrealised capital gains. Should such a gain be realised, that portion of the gain that is subject to capital gains tax will be distributed so that the Scheme is not subject to capital gains tax.

The benefit of imputation credits and foreign tax paid are passed on to unitholders where possible.

The Scheme has incurred withholding tax imposed by certain countries on investment income and capital gains. Such income is recorded net of withholding tax in the statement of comprehensive income.

# (h) Distributions

In accordance with the Scheme's Constitution, the Scheme distributes income adjusted for amounts determined by the Responsible Entity. Such distributions are recognised as payable when they are determined by the Responsible Entity of the Scheme.

# (i) Functional and presentation currency

Items included in the Scheme's financial statements are measured using the currency of the primary economic environment in which it operates ("the functional currency"). This is the Australian dollar, which reflects the currency of the economy in which the Scheme competes for funds and is regulated. The Australian dollar is also the Scheme's presentation currency.

# (j) Receivables

Receivables may include amounts for dividends, interest and securities sold where settlement has not yet occurred. Dividends and trust distributions are accrued when the right to receive payment is established. Interest is accrued at the end of each reporting period from the time of last payment in accordance with the policy set out in note 2(e) above. Amounts are generally received within 30 days of being recorded as receivables.

These amounts were recognised initially at fair value and subsequently measured at amortised cost. At each reporting date, the Scheme shall measure the loss allowance on receivables at an amount equal to the lifetime ECLs if the credit risk has increased significantly since initial recognition. If, at the reporting date, the credit risk has not increased significantly since initial recognition, the Scheme shall measure the loss allowance at an amount equal to 12-month ECLs. Significant financial difficulties of the counterparty, probability that the counterparty will enter bankruptcy or financial reorganisation, and default in payments are all considered indicators that a loss allowance may be required. If the credit risk increases to the point that it is considered to be credit impaired, interest income will be calculated based on the gross carrying amount adjusted for the loss allowance. A significant increase in credit risk is defined by management as any contractual payment which is more than 30 days past due. Any contractual payment which is more than 90 days past due is considered credit impaired.

The amount of the impairment loss is recognised in profit or loss within other expenses. When a receivable for which an impairment allowance had been recognised becomes uncollectible in a subsequent period, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against other expenses in profit or loss.

# (k) Payables

Payables include liabilities and accrued expenses owing by the Scheme which are unpaid as at the end of a reporting period.

Trades are recorded on trade date, and normally settled within two business days. Purchases of financial instruments that are unsettled at the end of each year are included in payables.

The distribution amount payable to unitholders as at the end of each year is recognised separately in the statement of financial position.

# (I) Applications and redemptions

Applications received for units in the Scheme are recorded net of any entry fees payable prior to the issue of units in the Scheme. Redemptions from the Scheme are recorded gross of any exit fees payable after the cancellation of units redeemed.

Unit redemption prices are determined by reference to the net assets of the Scheme divided by the number of units on issue.

# (m) Goods and Services Tax (GST)

Expenses of various services provided to the Scheme by third parties such as custodial services and investment Responsible Entity fees are recognised net of the amount of associated GST, unless the GST incurred is not recoverable from the taxation authority. In this case, it is recognised as part of the related expense or cost item.

Accounts payable and receivable are stated inclusive of the GST receivable and payable. The net amount of GST recoverable from, or payable to, the taxation authority is included in receivables or payables in the statement of financial position.

Cash flows relating to GST are included in the statement of cash flows on a gross basis.

# (n) Use of judgements and estimates

The preparation of the Scheme's financial statements requires it to make judgements, estimates and assumptions that affect the reported amounts of assets and liabilities. Uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability affected in the future. However, estimates are continually evaluated and based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The Scheme's financial instruments are valued primarily based on the prices provided by independent pricing services.

When the fair values of the reported financial instruments cannot be derived from active markets, they are determined using prices obtained from inactive or unquoted markets and/or other valuation techniques. The inputs to these valuation techniques (if applicable) are taken from observable markets to the extent practicable. Where observable inputs are not available, the inputs may be estimated based on a degree of judgments and assumptions in establishing fair values.

Where appropriate, the outcomes of the valuation techniques that are used in establishing fair values are validated using prices from observable current market transactions for similar instruments (without modification or repackaging) or based on relevant available observable market data.

The determination of what constitutes 'observable' requires significant judgement by the Scheme. The Scheme considered observable data to be market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

In addition, areas such as credit risk (both own and counterparty), volatilities and correlations require management to make estimates and judgements. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

For certain other financial instruments, including amounts due from/to brokers, accounts payable and accounts receivable, the carrying amounts approximate fair value due to the immediate or short-term nature of these financial instruments.

# (o) Other legislative/government developments

#### Climate related and other emerging risk disclosure

There is a continuing global push to standardise environmental, social and governance (ESG) reporting and be aware of how recent global developments, might be implemented in the Australian context. The IFRS Foundation has announced the formation of the International Sustainability Standards Board (ISSB) and the Australian regulatory environment continues to evolve.

## (p) Rounding of amounts

The Scheme is an entity of the kind referred to in ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191 issued by the Australian Securities and Investments Commission ("ASIC"), relating to the "rounding off" of amounts in the financial statements. Amounts in the financial statements have been rounded off in accordance with that ASIC Instrument to the nearest dollar, unless otherwise indicated.

#### (q) Comparatives

Where relevant, prior year comparatives have been restated to conform with current year presentation.

# 3 Interest income

	For the reporting	period ended
	30 June	30 June
	2022	2021
	\$	\$
Interest from cash and cash equivalents	<u> </u>	8
Total interest income	<u> </u>	8

# 4 Dividend/Distribution income

	For the reporting period ended	
	<b>30 June</b> 30	
	2022	2021
	\$	\$
Dividend income	634,464	703,391
Distribution income	35,519	59,475
Total Dividend/Distribution income	669,983	762,866

# 5 Net gains/(losses) on financial instruments at fair value through profit or loss

Net gains/(losses) recognised in relation to financial assets and financial liabilities at fair value through profit or loss:

	For the reporting period ended	
	<b>30 June</b> 30 June	
	2022	2021
	\$	\$
Net gains/(losses) on derivatives at fair value through profit or loss	(326,682)	(804,810)
Net gains/(losses) on other financial instruments at fair value through profit or loss	(241,637)	6,304,139
Total net gains/(losses) on financial instruments at fair value through profit or loss	(568,319)	5,499,329

# 6 Auditor's remuneration

During the reporting period the following fees were paid or payable for services provided by the auditor to the Scheme:

	For the reporting period ended		
	<b>30 June</b> 30		
	2022	2021	
	\$	\$	
КРМС			
Audit and other assurance services			
Audit and review of financial statements	6,825	6,500	
Other regulatory audit services	2,625	2,500	
Total remuneration for and other assurance services	9,450	9,000	
Taxation services			
Taxation compliance services	4,725	4,725	
Total remuneration for taxation services	4,725	4,725	
Total remuneration of KPMG	14,175	13,725	

# 7 Net assets attributable to unitholders

As stipulated within the Scheme's Constitution, each unit represents a right to an individual share in the Scheme and does not extend to a right to the underlying assets of the Scheme. There are no separate classes of units and each unit has the same rights attached to it as all other units of the Scheme.

Movements in number of units and net assets attributable to unitholders during the reporting period were as follows:

	For the reporting period ended			
	30 June	30 June	30 June	30 June
	2022	2021	2022	2021
	No.	No.	\$	\$
Balance as at 1 July	18,118,870	33,789,545	20,957,870	30,872,413
Applications	220,684	861,812	256,036	866,518
Redemptions	(18,339,853)	(16,952,745)	(21,145,895)	(16,929,459)
Units issued upon reinvestment of distributions	299	420,258	343	384,546
Distributions paid and payable	-	-	(16,561)	(160,000)
Total comprehensive income/(loss) for the reporting period	<u> </u>	<u> </u>	(51,793)	5,923,852
Closing balance	<u> </u>	18,118,870		20,957,870

# Capital risk management

The Scheme considered its net assets attributable to unitholders as capital. The amount of net assets attributable to unitholders can change significantly on a daily basis as the Scheme is subject to daily applications and redemptions at the discretion of unitholders.

Daily applications and redemptions were reviewed relative to the liquidity of the Scheme's assets on a daily basis by the Responsible Entity.

# 8 Distributions to unitholders

The distributions for the reporting period were as follows:

	For the reporting period ended			
	30 June	30 June	30 June	30 June
	2022	2022	2021	2021
	\$	CPU	\$	CPU
Distributions				
31 December	6,971	0.046	160,000	0.674
12 May	9,590	0.072		_
Total distributions	16,561	0.118	160,000	0.674

# 9 Financial assets at fair value through profit or loss

	As at	
	30 June	30 June
	2022	2021
	\$	\$
Financial assets at fair value through profit or loss		
Derivatives	-	436,598
Listed equities	-	18,752,829
Listed property trusts	<u> </u>	983,445
Total financial assets at fair value through profit or loss	<u> </u>	20,172,872

An overview of the risk exposures relating to financial assets at fair value through profit or loss is included in note 12.

# 10 Financial liabilities at fair value through profit or loss

	As at	
	30 June	30 June
	2022	2021
	\$	\$
Financial liabilities at fair value through profit or loss		
Derivatives	<u> </u>	84,480
Total financial liabilities at fair value through profit or loss	<u> </u>	84,480

An overview of the risk exposures relating to financial liabilities at fair value through profit or loss is included in note 12.

# **11** Derivative financial instruments

In the normal course of business, the Scheme may enter into transactions in various derivative financial instruments with certain risks. A derivative is a financial instrument or other contract which is settled at a future date and whose value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index or other variable.

Derivative financial instruments require no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.

# **11** Derivative financial instruments (continued)

Derivative transactions include many different instruments, such as forwards, futures and options. Derivatives are considered to be part of the investment process and the use of derivatives is an essential part of the Scheme's portfolio management. Derivatives are not managed in isolation. Consequently, the use of derivatives is multifaceted and includes:

- hedging to protect an asset or liability of the Scheme against a fluctuation in market values or to reduce volatility;
- a substitution for trading of physical securities; and
- adjusting asset exposures within the parameters set in the investment strategy, and adjusting the duration of fixed interest portfolios or the weighted average maturity of cash portfolios.

While derivatives are used for trading purposes, they are not used to gear (leverage) a portfolio. Gearing a portfolio would occur if the level of exposure to the markets exceeds the underlying value of the Scheme.

The Scheme may hold the following derivative instruments:

# (a) Futures

Futures are contractual obligations to buy or sell financial instruments on a future date at a specified price established in an organised market. The futures contracts are collateralised by cash or marketable securities. Changes in the value of futures contracts are usually settled net daily with the exchange. Interest rate futures are contractual obligations to receive or pay a net amount based on changes in interest rates at a future date at a specified price, established in an organised financial market.

# (b) Options

An option is a contractual arrangement under which the seller (writer) grants the purchaser (holder) the right, but not the obligation, either to buy (a call option) or sell (a put option) at or by a set date or during a set period, a specific amount of securities or a financial instrument at a predetermined price. The seller receives a premium from the purchaser in consideration for the assumption of future securities price risk. Options held by the Scheme are exchange-traded. The Scheme is exposed to credit risk on purchased options to the extent of their carrying amount, which is their fair value. Options are settled on a gross basis.

The Scheme's derivative financial instruments at year-end are detailed below:

The Scheme held no derivative financial instruments as at 30 June 2022.

		Fair V	/alue
	/Contract notional value	Assets	Liabilities
30 June 2021	\$	\$	\$
Share price index futures	(905,286)	2,411	-
Share options	1,474,125	25,287	-
Share index options	502,939	408,900	(84,480)
Total derivative instruments	1,071,778	436,598	(84,480)

An overview of the risk exposures relating to derivatives is included in note 12.

# 12 Financial risk management

# (a) Objectives, strategies, policies and processes

The Scheme's activities may expose it to a variety of financial risks: market risk (including price risk, foreign exchange risk and interest rate risk), credit risk and liquidity risk.

The Responsible Entity's overall risk management program focuses on ensuring compliance with the Scheme's Product Disclosure Statement and seeks to maximise the returns derived for the level of risk to which the Scheme is exposed. Financial risk management is carried out by an Investment Manager ("the Investment Manager") under policies approved by the Board of Directors of the Responsible Entity ("the Board").

The Scheme used different methods to measure different types of risk to which it is exposed. These methods included sensitivity analysis in the case of interest rate, foreign exchange and other price risks, and ratings analysis for credit risk.

As part of Responsible Entity risk management strategy, the Scheme used derivatives and other investments, including share price and bond futures, interest rate swaps and forward currency contracts, to manage exposures resulting from changes in interest rates, foreign currencies, equity price risks, and exposures arising from forecast transactions.

# (b) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: price risk, foreign exchange risk and interest rate risk. Market risk is managed and monitored using sensitivity analysis, and minimised through ensuring that all investment activities are undertaken in accordance with established mandates and investment strategies.

The market risk disclosures are prepared on the basis of the Scheme's direct investments and not on a look-through basis for investments held in the Scheme.

The sensitivity of the Scheme's net assets attributable to unitholders (and profit/(loss)) to price risk, foreign exchange risk and interest rate risk is measured by the reasonably possible movements approach. This approach is determined based on management's best estimate, having regard to a number of factors, including historical levels of changes in interest rates and foreign exchange rates, historical correlation of the Scheme's investments with the relevant benchmarks and market volatility. However, actual movements in the risk variables may be greater or less than anticipated due to a number of factors, including unusually large market shocks resulting from changes in the performance of the economies, markets and securities in which the Scheme invested. As a result, historic variations in the risk variables are not a definitive indicator of future variations in the risk variables.

The overall market exposures were as follows:

	As at	
	30 June	30 June 30 June
	2022	2021
	\$	\$
Derivative assets at fair value through profit or loss	-	436,598
Derivative liabilities at fair value through profit or loss	-	(84,480)
Securities at fair value through profit or loss	<u> </u>	19,736,274
	<u> </u>	20,088,392

# (i) Price risk

Price risk is the risk that the fair value or future cash flows of equities will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or by factors affecting all similar financial instruments traded in the market.

Price risk exposure arises from the Scheme's investment portfolio. The investments are classified on the statement of financial position as at fair value through profit or loss. All investments present a risk of loss of capital. The maximum risk resulting from financial instruments is determined by the fair value of the financial instruments.

# (b) Market risk (continued)

# (i) Price risk (continued)

The Investment Manager mitigated this price risk through diversification and a careful selection of securities and other financial instruments within specified limits set by the Board.

The Scheme's overall market positions were monitored on a regular basis by the Scheme's Investment Manager. This information and the compliance with the Scheme's Product Disclosure Statement are reported to the relevant parties on a regular basis as deemed appropriate such as the compliance manager, other key management personnel, compliance committees and ultimately the Board.

At 30 June 2022 and 30 June 2021, if the equity prices had increased/(decreased) by the percentage indicated below, with all other variables held constant, the net assets attributable to unitholders (and profit/(loss)) would have changed by the following amounts, approximately and respectively:

	As at 30 J	une 2022	As at 30 J	une 2021
	Increased by 10%	Decreased by 10%	Increased by 10%	Decreased by 10%
	\$	\$	\$	\$
Increase/(decrease) in net assets attributable to unitholders (and profit/(loss))	<u> </u>	<u> </u>	2,008,839	(2,008,839)

#### (ii) Foreign exchange risk

There was no significant direct foreign exchange risk in this Scheme as at 30 June 2022 (2021: Nil).

#### (iii) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Responsible Entity established interest rate management strategies to manage the risk of the Scheme. This includes managing exposures around the benchmark and hedging exposures through the use of derivatives.

In accordance with the Scheme's guidelines, the Responsible Entity via the Investment Manager monitors the Scheme's overall interest sensitivity on a daily basis.

Interest rate risk was not considered to be significant to the Scheme except in relation to investments in interest bearing securities. The Scheme does not have any investments in interest bearing securities at 30 June 2022 and 30 June 2021.

However, the Scheme could hold cash for liquidity and transactional purposes and this cash was held at floating rates of interest. As a result, the Scheme is not subject to material exposure to interest rate risks due to fluctuations in the levels of the market interest rates.

#### (c) Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Credit risk primarily arises from investments in debt securities and from trading derivative products. Other credit risk arises from cash and cash equivalents, and deposits with banks and other financial institutions.

# (c) Credit risk (continued)

With respect to credit risk arising from the financial assets of the Scheme, other than derivatives, the Scheme's exposure to credit risk arises from default of the counterparty, with the current exposure equal to the fair value of these investments as disclosed in the statement of financial position. This does not represent the maximum risk exposure that could arise in the future as a result of changes in values, but best represents the current maximum exposure at the end of the year.

Credit risk arising from derivative financial instruments is, at any time, limited to those with positive fair values.

All transactions in listed securities are settled/paid for upon delivery using approved brokers. The risk of default is considered low, as delivery of securities sold is only made once the broker has received payment. Payment is made once purchase of the securities has been received by the broker. The trade will fail if either party fails to meet its obligations.

The Scheme held no collateral as security or any other credit enhancements. There are no financial assets that are past due or impaired, or would otherwise be past due or impaired.

Counterparty credit limits and the list of authorised brokers are reviewed by the relevant parties within the Responsible Entity on a regular basis as deemed appropriate.

The Investment Manager monitored the Scheme's credit position on a regular basis. This information and the compliance with the Scheme's guidelines are reported to the relevant parties on a regular basis as deemed appropriate such as the compliance manager, other key management personnel, compliance committees and ultimately the Board. All contracts are with counterparties included in the Board's Approved Counterparties list.

There was no significant credit risk in the Scheme as at 30 June 2022 (2021: Nil).

# (d) Concentrations of risk

Concentrations of risk arise when a number of financial instruments are entered into with the same counterparty, or where a number of counterparties are engaged in similar business activities, or activities in the same geographical region, or have similar economic conditions. These similarities would cause the counterparties' liabilities to meet their obligations to be similarly affected by certain changes in the risk variables.

The concentrations of risk were monitored by the Investment Manager to ensure they are within acceptable limits by reducing the exposures or by other means as deemed appropriate.

Concentrations of risk were managed by industry sector for equity instruments and by counterparty for debt instruments and selected derivatives.

Based on the concentrations of risk that are managed by industry sector, the following investments can be analysed by the industry sector and/or counterparty as at 30 June 2022 and 30 June 2021:

As the Scheme ceased operations on 30 June 2022, there is no concentrations of risk as of this date.

	%
At 30 June 2021	
Financials	29.39
Materials	20.51
Consumer Discretionary	14.10
Others - aggregated concentration made up of other industries less than 10%	36.00
Total	100.00

# (e) Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. This risk is controlled through the Scheme's investment in financial instruments, which under normal market conditions are readily convertible to cash. In addition, the Scheme maintains sufficient cash and cash equivalents to meet normal operating requirements.

The Scheme may be exposed to daily cash redemptions of redeemable units and daily margin calls on derivatives. It therefore primarily held investments that were traded in active markets and can be readily disposed of.

The Scheme's investments may include listed securities that are considered readily realisable, as they are listed on recognised stock exchanges.

The Scheme may invest in investments in unlisted unit trusts that expose the Scheme to the risk that the Scheme or Investment Manager of those trusts may be unwilling or unable to fulfil the redemption requests within the timeframe requested by the Scheme.

The Scheme may have, from time to time, invested in derivative contracts traded over the counter, which are not traded in an organised market and may be illiquid. As a result, the Scheme may have been able to quickly liquidate its investments in these instruments at an amount close to their fair value to meet its liquidity requirements or to respond to specific events such as a deterioration in the creditworthiness of any particular issuer. No such investments were held at the end of the reporting period.

The Scheme's guidelines are to hold a significant proportion of its investments in liquid assets.

Under the terms of its Constitution, the Scheme had the ability to manage liquidity risk by delaying redemptions to unitholders, if necessary, until the funds are available to pay them.

Units were redeemed on demand at the unitholders' option. The holders of these instruments typically retained them for the medium to long term.

In accordance with the Scheme's guidelines, the Investment Manager monitors the Scheme's liquidity position on a regular basis. This information and the compliance with the Scheme's guidelines are reported to the relevant parties on a regular basis as deemed appropriate such as compliance manager, other key management personnel, compliance committees and ultimately the Board.

#### (i) Maturity of non-derivative financial liabilities

The table below analyses the Scheme financial liabilities into relevant maturity groupings based on the remaining period at the end of the reporting period to the contractual maturity date. The amounts in the table are the contractual undiscounted cash flows.

The Scheme ceased operations as of 30 June 2022, there is no liquidity risk as of this date.

	Less than 1 month \$	1-3 months \$	3-12 months \$	More than 12 months \$
At 30 June 2021				
Payables	221,601			
Total financial liabilities	221,601	<u> </u>		

# (e) Liquidity risk (continued)

The table below analyses the Scheme's derivative financial instruments into relevant maturity groupings based on the remaining period at the end of the reporting period to the contractual maturity date.

The Scheme held no derivative financial instruments as at 30 June 2022.

	Less than 1 month \$	1-3 months \$	3-12 months \$	More than 12 months \$
At 30 June 2021				
Futures				
- Inflows	-	2,411	-	-
Options				
- (Outflows)	-	-	(84,480)	-
- Inflows		165,588	268,599	
	<u> </u>	167,999	184,119	

As disclosed above, the Scheme predominantly invested in liquid assets that it expected to be able to liquidate within 7 days or less. Liquid assets include cash and cash equivalents and net Level 1 Financial Instruments (listed equities, listed property trusts and derivatives). As at 30 June 2022, these assets amounted to \$Nil (2021: \$21,033,540).

# (f) Estimation of fair values of financial assets and liabilities

The carrying amounts of all the Scheme's financial assets and financial liabilities at the end of the reporting period approximated their fair values.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Scheme's accounting policy on fair value measurement is set out in note 2(b). The methods and assumptions used in the determination of the fair value of each class of financial instruments are also set out in note 2(b).

Note 2(n) outlines further the nature of management's judgements, estimates and assumptions that might have been used in the determination of the fair values of these financial instruments.

#### (g) Fair value hierarchy

The Scheme is required to classify fair value measurements using a fair value hierarchy that reflects the subjectivity of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices); quoted prices for similar securities in active and/or inactive markets; market-corroborated inputs; inputs that are developed based on available market data and reflect assumptions that markets would use when pricing similar securities.
- Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes "observable" requires significant judgement by the Scheme. The Scheme considered observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

# (g) Fair value hierarchy (continued)

The table below sets out the Scheme's financial assets and liabilities (by class) measured at fair value according to the fair value hierarchy at the reporting date.

The Scheme did not hold any financial assets or financial liabilities as at 30 June 2022.

30 June 2021	Level 1 \$	Level 2 \$	Level 3 \$	Total \$
Financial assets				
Futures	2,411	-	-	2,411
Share options	25,287	-	-	25,287
Share index options	408,900	-	-	408,900
Listed equities	18,752,829	-	-	18,752,829
Listed property trusts	983,445		_	983,445
Total	20,172,872			20,172,872
Financial liabilities				
Share index options	84,480		_	84,480
Total	84,480		_	84,480

The pricing for the majority of the Scheme's investments is generally sourced from independent pricing sources, the relevant Investment Managers or reliable brokers' quotes.

Investments whose values are based on quoted market prices in active markets, e.g. recognised stock exchanges, and therefore classified within level 1, include active listed equities and exchange traded derivatives.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. The observable inputs include prices and/or those derived from prices. The level 2 instruments include investment-grade corporate bonds, and over-the-counter derivatives. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Level 2 investments could include those that are not traded in active markets and/or are subject to transfer restrictions (e.g. redemption restrictions). Valuations for these investments may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information. Typically, prices of units in unlisted managed investment trusts that are either published on the investment manager's website and/or circulated among market participants as executable quotes are categorised as level 2.

Investments classified within level 3 have significant unobservable inputs, as they are infrequently traded. Level 3 instruments include certain unlisted unit trusts and corporate debt securities. As observable prices are not available for these securities, valuation techniques are used to derive fair value.

There were no transfers between any levels for the years ended 30 June 2022 and 30 June 2021.

There were no level 2 or level 3 instruments as at 30 June 2022 (2021: Nil).

# 13 Related party transactions

#### (a) Responsible Entity

The Responsible Entity of Perennial Value Wealth Defender Australian Shares Trust is Perennial Investment Management Limited.

The immediate parent entity and the controlling entity of Perennial Investment Management Limited is Perennial Value Management Limited.

# (b) Directors

Key management personnel include persons who were Directors of Perennial Investment Management Limited at any time during the year.

# (c) Other key management personnel

There were no other persons with responsibility for planning, directing and controlling the activities of the Scheme, directly or indirectly during the reporting period.

# (d) Key management personnel unitholdings

As at 30 June 2022 and 30 June 2021, no Directors of the Trustee held units in the Scheme.

#### (e) Key management personnel compensation

Key management personnel are remunerated by Perennial Value Management Limited.

Payments made from the Scheme to Perennial Investment Management Limited do not include any amounts that are directly attributable to the key management personnel remuneration.

#### (f) Key management personnel loan disclosures

The Scheme has not made, guaranteed or secured, directly or indirectly, any loans to the key management personnel or their personally related entities at any time during the year.

#### (g) Other transactions within the Scheme

From time to time, Directors of the Responsible Entity, or their related parties, may invest in or withdraw from the Scheme. These investments or withdrawals are on the same terms and conditions as those entered into by other Scheme investors and are trivial in nature.

#### (h) Responsible Entity's/manager's fees and other transactions

The Responsible Entity fee charged by the Responsible Entity for the reporting period was 0.98% per annum (2021: 0.98%).

The transactions during the reporting period and amounts payable at reporting period end between the Scheme and the Responsible Entity were as follows:

	30 June 2022 \$	30 June 2021 \$
Responsible Entity fees for the reporting period paid by the Scheme to the Responsible Entity (GST exclusive)	108,028	266,940
Responsible Entity fees payable to the Responsible Entity at the end of the reporting period (GST exclusive)	<u> </u>	17,299

# 13 Related party transactions (continued)

# (i) Related party unitholdings

Parties related to the Scheme including Perennial Investment Management Limited, its related parties and other schemes managed by Perennial Investment Management Limited do not hold any units in the Scheme.

# (j) Investments

The Scheme did not hold any investments in Perennial Investment Management Limited or its related parties during the year.

# 14 Reconciliation of profit/(loss) to net cash inflow/(outflow) from operating activities

	For the reporting	period ended
	30 June	30 June
	2022	2021
	\$	\$
(a) Reconciliation of profit/(loss) to net cash inflow/(outflow) from operating activities		
Profit/(loss) for the reporting period	(51,793)	5,923,853
Net (gains)/losses on financial instruments at fair value through profit or loss	568,319	(5,499,329)
Proceeds from sale of financial instruments at fair value through profit or loss	30,248,415	53,971,106
Payments for the purchase of financial instruments at fair value through profit or loss	(10,782,307)	(37,713,074)
Net change in receivables and other assets	95,551	20,266
Net change in payables and other liabilities	(18,564)	(13,004)
Reinvested income		(9,472)
Net cash inflow from operating activities	20,059,621	16,680,346
(b) Components of cash and cash equivalents		
Cash as at the end of the year as shown in the statement of cash flows is reconciled to the statement of financial position as follows:		
Cash and cash equivalents	<u> </u>	945,148
	<u> </u>	945,148
(c) Non-cash financing activities		
During the year, the following distribution payments were satisfied by the issue of units under		
the distribution reinvestment plan	343	384,546
Proceeds from application for units	11,556,994	2,144,249
Payments for redemption of units	(11,556,994)	(2,144,249)
Distribution receipts were satisfied by the issue of units under distribution reinvestment plans	<u> </u>	9,472
	343	394,018
4.5. Example a second		

# 15 Events occurring after the reporting period

There are no likely developments for this Scheme as it was wound up as at 30 June 2022.

# 16 Contingent assets and liabilities and commitments

There are no outstanding contingent assets and liabilities or commitments as at 30 June 2022 and 30 June 2021.

# Directors' declaration

In the opinion of the Directors of the Responsible Entity:

- (a) the financial statements and notes set out on pages 6 to 27 are in accordance with the Corporations Act 2001, including:
  - (i) complying with Australian Accounting Standards, the *Corporations Regulations 2001* and other mandatory professional reporting requirements; and
  - (ii) giving a true and fair view of the Scheme's financial position as at 30 June 2022 and of its performance, as represented by the results of its operations and cash flows, for the reporting period ended on that date.
- (b) the financial statements are in accordance with the Scheme's Constitution.
- (c) note 2(a) confirms that the financial statements also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board.

This declaration is made in accordance with a resolution of the Directors.

A. Patterson Director

# Independent Auditor's Report

# To the unitholders of Perennial Value Wealth Defender Australian Shares Trust

Opinion	
We have audited the <i>Financial Report</i> of	The <i>Financial Report</i> comprises:
Perennial Value Wealth Defender Australian Shares Trust (the Scheme).	• Statement of financial position as at 30 June 2022;
In our opinion, the accompanying Financial Report of the Scheme is in accordance with the <i>Corporations Act 2001</i> , including:	• Statement of comprehensive income, Statement of changes in equity, and Statement of cash flows for the year then ended;
<ul> <li>giving a true and fair view of the Scheme's financial position as at</li> </ul>	<ul> <li>Notes including a summary of significant accounting policies; and</li> </ul>
30 June 2022 and of its financial performance for the year ended on that date; and	Directors' Declaration.

• complying with Australian Accounting Standards and the Corporations Regulations 2001.

# **Basis for opinion**

We conducted our audit in accordance with *Australian Auditing Standards*. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the Financial Report* section of our report.

We are independent of the Scheme in accordance with the *Corporations Act 2001* and the ethical requirements of the *Accounting Professional and Ethical Standards Board's APES 110 Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the Financial Report in Australia. We have fulfilled our other ethical responsibilities in accordance with these requirements.

# **Other Information**

Other Information is financial and non-financial information in the Scheme's annual reporting which is provided in addition to the Financial Report and the Auditor's Report. The Directors of Perennial Investment Management Limited (the Responsible Entity) are responsible for the Other Information.

Our opinion on the Financial Report does not cover the Other Information and, accordingly, we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the Financial Report, our responsibility is to read the Other Information. In doing so, we consider whether the Other Information is materially inconsistent with the Financial Report or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

KPMG, an Australian partnership and a member firm of the KPMG global organisation of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee. All rights reserved. The KPMG name and logo are trademarks used under license by the independent member firms of the KPMG global organisation. Liability limited by a scheme approved under Professional Standards Legislation.

We are required to report if we conclude that there is a material misstatement of this Other Information, and based on the work we have performed on the Other Information that we obtained prior to the date of this Auditor's Report we have nothing to report.

# **Responsibilities of the Directors for the Financial Report**

The Directors of Perennial Investment Management Limited (the Responsible Entity) are responsible for:

- preparing the Financial Report that gives a true and fair view in accordance with Australian Accounting Standards and the Corporations Act 2001;
- implementing necessary internal control to enable the preparation of a Financial Report that gives a true and fair view and is free from material misstatement, whether due to fraud or error; and
- assessing the Scheme's ability to continue as a going concern and whether the use of the going concern basis of accounting is appropriate. This includes disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless they either intend to liquidate the Scheme or to cease operations, or have no realistic alternative but to do so.

# Auditor's responsibilities for the audit of the Financial Report

Our objective is:

- to obtain reasonable assurance about whether the Financial Report as a whole is free from material misstatement, whether due to fraud or error; and
- to issue an Auditor's Report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with *Australian Auditing Standards* will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error. They are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the Financial Report.

A further description of our responsibilities for the audit of the Financial Report is located at the *Auditing and Assurance Standards Board* website at: <u>https://www.auasb.gov.au/auditors\_responsibilities/ar4.pdf</u>.

This description forms part of our Auditor's Report.
